Hi
I'm full time Uber driver . Is there any authority which controls the Uber because looks like Government has given free hand to them to do anything .
Our working conditions are seriously poor . We have been working 70-80hrs to make our ends meet and as per the NSW transport Law , we are allowed to work maximum 70hrs in a week. This is serious breach of Law and Fatigue can be dangerous.
Secondly- International Students are allowed to work for 20 hrs a week but they have been driving way more than that because no Authority is monitoring it.
All Uber cars must have inside Camara , this will protect both Rider and Driver in case of any Assault to prove who was in fault.
Uber has good technology but Government should set some criteria for them too like (Insurance, Peak & Off Peak fare, Public Holiday and Weekend Fare,Cap the number of Cars Uber can put on roads).
All Uber driver aged over 60 years must provide the Medical certificate every year for the safety of road users.
Please consider all this to protect our Incomes because Uber is just using us and they have power to Hire and Fire.
Regards
Sandeep
