Dear Sir / Madam

I operate a mini bus company and have a vehicle under 12 seats, I am still unsure by your proposal! Are you looking for suggestions from experienced people within the industry? OR are you going to destroy this industry like they did with the Hire Cars and Taxis with the introduction of Uber.

The small businesses that have vehicles under 12 seats, have a market for this size vehicle, "example" the corporate companies that use our services need us to get them to their offices, meetings, functions, corporate events BECAUSE, we can use bus and transit lanes, and it is a convenience to them. As you know travel times in Sydney are getting worse by the day, you take this away from us and we may as well close our doors.

Please consider the small business

Many thanks

Kind regards

Joe Casale
