# Transport Access Program

## Merrylands Commuter Car Park

COMMUNITY NOTIFICATION

APRIL/MAY 2018

Transport for NSW in conjunction with delivery partner A W Edwards is improving commuter parking at Merrylands Station by constructing approximately **96 new spaces** across two locations. This project is being delivered as part of the NSW Government's Transport Access Program.

### Changes to the design of the Merrylands Commuter Car Park

Transport for NSW is modifying the design of the Merrylands Commuter Car Park providing an additional part-level to the car parking facility at Terminal Place.

The modifications follow discussions with Cumberland Council regarding relocation of stormwater drainage at the site. The design changes will maximise the number of parking spaces at this location with customers soon to benefit from approximately 231 parking spaces – **96 new spaces** – across both the Terminal Place and Railway Terrace sites.

Transport for NSW has assessed the changes to ensure consistency with the approved project noted in the Review of Environmental Factors and Determination Report. The changes will not impact on other environmental and/or socio-economic aspects.

### Extended working hours

Due to unforeseen circumstances, the concrete pour initially planned for 19<sup>th</sup> April 2018 will now occur on **Thursday 26<sup>th</sup> April 2018** (subject to weather and site conditions).

Due to the size of the pour, it is estimated that **works may continue until approximately 11pm** on this day. Activities occurring on site after 6pm will include finishing of the concrete slabs and the pack up of equipment.

**Additional after hours work is also scheduled in May**, with concrete pours planned during the first two weeks of May 2018 (subject to weather and site conditions).

**Equipment to be used** includes concrete pump and trucks, motorised power trowel and handheld tools. You may notice workers on site during this time. It is not anticipated that significant noise will be generated by these works.

## Upgrades to water services at Terminal Place

Transport for NSW will be upgrading underground water services along Terminal Place. This work will commence in **early May and continue through to early June 2018**.

The work will be staged in four phases so as to minimise pedestrian disruptions. As part of this work, customers may notice traffic controllers, signage, safety barriers and temporary pedestrian diversions. **The activities will not impact accessibility to the Station with lift access remaining available at all times.**

## Current site activities

- Construction of formwork for suspended concrete structure and installation of steel reinforcement.
- Placement of concrete for car park structure.
- Installation and modification of site scaffold.

## Standard construction hours

Work will continue during standard work hours, which are **Monday to Friday from 7am to 6pm and Saturdays from 8am to 1pm.**

Thank you for your patience and cooperation during this important work.
