

Transport Access Program

Ashfield Commuter Car Park

COMMUNITY NOTIFICATION

FEBRUARY 2018

The Ashfield Commuter Car Park is part of the Transport Access Program, a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern and integrated transport infrastructure.

Project overview

The Ashfield Commuter Car Park project will provide around 95 additional parking spaces on Brown Street, plus a range of features and facilities to make it safer and more accessible to commuters.

Key benefits of the project include:

- up to 95 extra parking spaces on Brown Street, bringing the total to approximately 235 parking spaces
- lift access for those with accessibility issues, parents with prams and customers carrying luggage
- new lighting and CCTV.

Construction update

The construction of the above-ground structure is progressing well with the upcoming installation of the car park façade and painting and finishing works. You may notice the following activities occurring on site and on Brown Street over February:

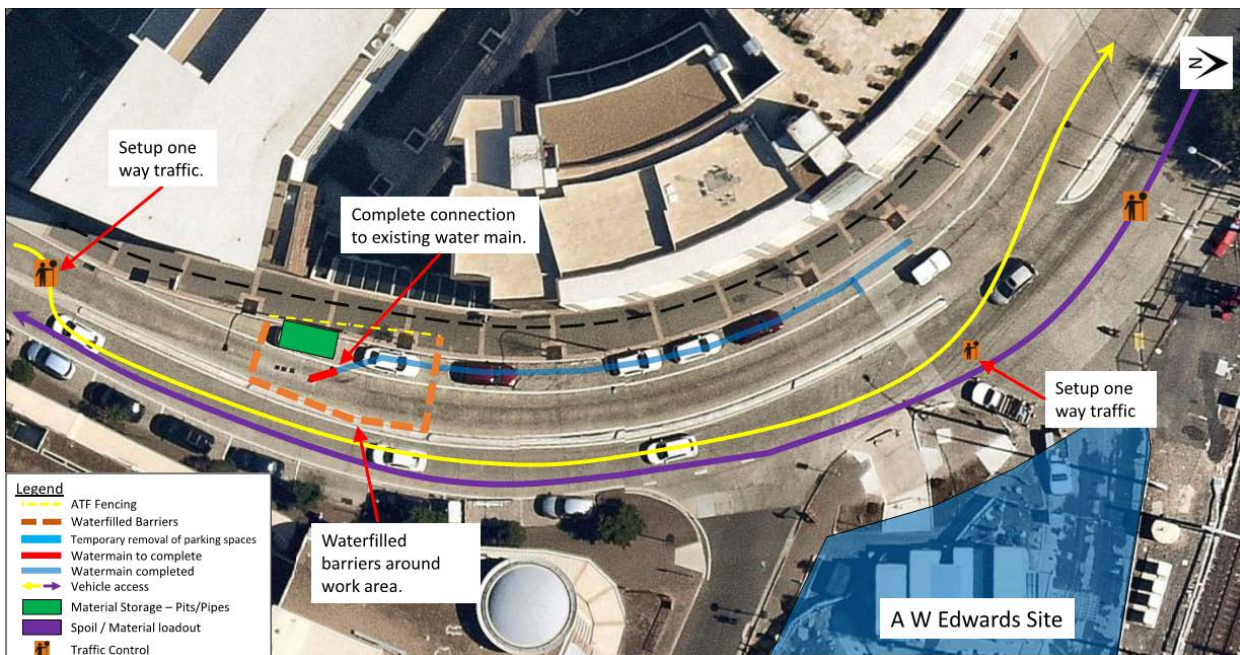

- installation of façade
- placement of concrete at the front of the car park
- removal of scaffolding
- painting and other finishes.

Night works – Thursday 15 February 2018

There are planned night works along Brown Street on **Thursday 15 February 2018 from 6pm to 7am the following morning** to allow Sydney Water to complete the final connection into the existing water main as part of the recent works. These works will involve temporary changes to vehicle movements on Brown Street. Modified driving conditions will be in place and traffic control personnel will be on duty to assist with vehicle movements and traffic flow. To facilitate these works, **approximately 7 parking spaces will be unavailable on Brown Street during this period**, as detailed in the diagram below. Signage will be installed to notify users prior to works commencing.

Due to the activities involved with these works, the water main will be temporarily isolated cutting off water to the local area. Impacted residents and businesses will be directly contacted by Sydney Water prior to these works being undertaken.

Equipment to be used includes an excavator, wacker packer, angle grinder and lighting tower as well as hand and power tools. It is not anticipated that significant noise will be generated by these works. Every effort will be made to minimise the impact on surrounding residents and businesses.

Standard construction hours

Work will continue during standard work hours, which are **Monday to Friday from 7am to 6pm** and **Saturday from 8am to 1pm**.

Continual surveillance of noise generation, dust control and traffic and pedestrian impacts is undertaken in order to improve techniques and minimise the impact on the surrounding community.

We apologise for any inconvenience caused and thank you for your patience and cooperation during these important works.
