New Intercity Fleet
Port Kembla Stabling Yard

MARCH 2018 COMMUNITY NOTIFICATION

The NSW Government is delivering a New Intercity Fleet to replace the trains carrying customers from Sydney to the Central Coast, Newcastle, the Blue Mountains and the South Coast.

The new state-of-the-art trains will replace the ageing V-Sets to provide customers with a more comfortable and reliable journey. The trains will feature wider, more spacious seats with arm rests, charging facilities for mobile devices, two by two seating for extra room and comfort, dedicated spaces for luggage, prams, bicycles and wheelchairs, improved accessibility including accessible toilets, cup holders and tray tables, improved customer information through digital information screens and announcements, CCTV and help points, and modern air conditioning.

Project overview

To support the introduction of the New Intercity Fleet, modifications will be made at a number of existing stabling facilities around the network, including at Port Kembla Stabling Yard. This work will be carried out within the rail corridor.

Temporary station closure – Port Kembla Station

As part of a Sydney Trains shutdown period, Port Kembla Station will be closed from Tuesday 20 to Thursday 29 March. No train services will run from Port Kembla Station during this period. The commuter car park located at Port Kembla Station will also be closed to allow for works to be carried out safely.

During this shutdown, work will be carried out 24 hours a day to install cable routes, fencing, new footpaths, lights, light poles and a distribution board. Some of this work may require minor vegetation removal.

Please call 131 500 or visit transportnsw.info for more information about replacement services.

What you may notice

Equipment to be used includes excavators, vacuum trucks, cranes, concrete trucks and concrete pumps, tip trucks, day makers, work vehicles and various hand and power tools.

Access to the rail corridor will be via Old Port Road.

All efforts to reduce potential impacts to businesses and residents have been made, however there may be some noise and vibration associated with this work.
Keeping the community informed
If you would like to speak with the project team, please contact us at the details provided below. Thank you for your patience and understanding during this work.
