Transport for NSW is boosting safety across the electrified rail network by delivering new Automatic Train Protection (ATP) technology.

**Project overview**
The technology will provide real-time information about speed limits and signal locations to train drivers and network operations teams. ATP will provide additional safety benefits and more reliable services by ensuring trains operate within the permitted speed limit.

This includes:
- installation of balises (electronic transponders) in the rail corridor between existing trackside infrastructure to monitor train speeds
- installation of equipment on board all suburban and Intercity train fleets that will continually collect information such as the train's speed, distance and direction.

ATP is being rolled out across the Sydney Trains and NSW TrainLink electrified network including the South Coast Line as far as Kiama, the Blue Mountains Line to Lithgow, and the Central Coast / Newcastle Line.

Broadspectrum is installing ATP across much of the Sydney Trains and NSW TrainLink electrified network on behalf of Transport for NSW.

**Construction hours**
Standard construction hours are 7am to 6pm Monday to Friday and 8am to 1pm Saturday. For the safety of customers and our staff, some work will be required outside these hours. We will notify the local community and businesses prior to out of hours work taking place.

**Weekend work 7-8 September**
To minimise disruption to our customers and ensure the safety of workers, we will be carrying out some of these works during a scheduled trackwork weekend. This month we will be working from 6am to 6pm on Saturday 7 and Sunday 8 September near Lapstone Station.

**What you may notice**
As part of these works, we will undertake construction works to install new train signalling equipment. This work will include the use of a dump truck and excavator.

All work will occur within the rail corridor, and access to the site will be via two points: workers will use the access gate adjacent to the corner of Dawes Place and Explorers Road, and equipment will enter via the access gate within the Lapstone Station Commuter Car Park.

For more information call 1800 684 490, Email projects@transport.nsw.gov.au or visit transport.nsw.gov.au/projects
For urgent enquiries or complaints regarding construction activities, please call 24 hours 1800 775 465
Some of this work may be noisy and we will take every precaution to minimise noise impacts such as turning off machinery when not in use and placing equipment as far away from properties as possible.

**Keeping the community informed**

For the latest information, please check the website transport.nsw.gov.au/projects or call 1800 684 490. For urgent enquiries or complaints, call our 24 hour construction response line on 1800 775 465.

Thank you for your patience and understanding during these important safety improvements to the rail network.
