Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**Weekend work**

We will be working from 10pm Friday 2 August to 6pm Sunday 4 August within the rail substation off Cumberland Street, The Rocks and within the rail corridor on the Harbour Bridge to install overhead wire structures and carry out adjustments.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend works. Please contact Transport Info on 131 5000 or visit transportnsw.info for more information about replacement bus services.

**Temporary lane closure**

From 11pm Saturday 3 August to 7am Sunday 4 August, the northbound lane adjacent to the rail corridor, along the Sydney Harbour Bridge will be closed while works are carried out.

Traffic delays may be experienced due to the lane closure. Please allow additional time to travel across the bridge. Traffic control will be in place.

**What you may notice**

Staff access to the rail corridor will be via Cumberland Street, behind the Harbour View Hotel on the corner of Lower Fort Street.

**Construction equipment**

Equipment to be used includes cherry pickers, lighting towers, hi-rail vehicles, work vehicles and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

**Keeping the community informed**

If you would like to speak with the project team about these works, please contact us through the details provided below. Thank you for your understanding during these work.
