

Transport Access Program

Edgecliff Station Upgrade

COMMUNITY NOTIFICATION

FEBRUARY 2019

The Transport Access Program is a Transport for NSW initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure.

Image: included images of escalator stages, lift details and kerb extension completion.

Project update

Transport for NSW is upgrading Edgecliff Station to make it more user-friendly and easier for everyone to access. February will see some exciting developments at Edgecliff, with the lift to the bus interchange to be completed and open to the public in February.

Lift to the Bus Interchange

Liftronic, the lift manufacturer and installation company, is now busy installing the lift car in the recently constructed steel lift shaft which operates between the bus interchange, gallery and concourse levels at Edgecliff Station. The area which is currently fenced off will be reduced to enable customers' easy access between the lift, bicycle cage and the bus interchange.

For more information call 1800 684 490,

For urgent enquiries or complaints regarding construction activities, please call 24 hours 1800 775 465

New Ticket Gates

New ticket gates, which will be located closer to New South Head Road, are being installed on the station concourse from the end of February. Additional gates are also being installed in this location to improve customer flow and increase circulation space within the paid station concourse.

Bus interchange

There will be temporary changes to seating available in the bus interchange due to the installation of the new wind breaks. Numbers of seats available to commuters may be impacted at times, however all seats will be reinstated upon completion of works.

Platform Works (including escalator replacement)

Testing of the first set of new escalators will commence at the end of February. The new escalators are scheduled to be available for use in March.

Changes to Pedestrian Access

Station Concourse

Towards the end of February, there will be some changes on the paid concourse ticketing area to enable commencement of the ticket gate works. These activities will all be conducted at night to minimise disruption to the public, with trenches being covered during the day to maintain safe access. These works are not expected to be audible outside of the station building. While new gates are being installed and programmed, doors will be left in the 'open' position. Commuters are to continue through to the old gates and tap their Opal cards or single use tickets as usual.

Platform and Escalators

There will be changes to station platform access in late February, as the route via the temporary stairs will be closed during the construction of permanent stairs. This will not cause inconvenience to the public as both sets of escalators will be in operation.

Standard construction hours

Standard working hours are **7am to 6pm Monday to Friday**, and **8am to 1pm Saturday**. Works during these hours will occur behind the hoardings or temporary fencing. In consultation with local businesses and residents, we will aim to complete all major noisy works during these hours, including most material movements. Suitable respite periods and noise reduction methods will be used where possible.

Out of hours works

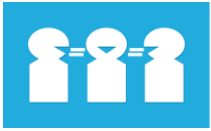

Night works will continue within station areas between **8pm** and **5am**, **Sunday** through **Thursday** throughout the month of February. Work will be conducted within the station building, mitigation measures such as noise monitoring and respite periods will be utilised to minimise impact on surrounding residents.

Date	Bus Interchange		Station Platform & Concourse	
27 th January to 2 nd February	2000 - 0500	Delivery and installation of new wind break frames within bus interchange.	2000 - 0500	Construction works inside the station.
	There will be some additional workers during this period to fast track work in order to minimise the impact on daytime bus operations. These works may have increased noise levels.		These works are not expected to be noisy outside of the station building.	
3 rd to 9 th February	2000 - 0500	Kerb and gutter works, changes to ATF fencing configuration and potential wind break construction activities.	2000 - 0500	Escalator replacement occurring within the station.
	The commencement of lift operations means there will be a reduction in the construction zone.		These works are not expected to be noisy outside of the station building.	
10 th to 16 th February	2000 - 0500	Minor construction activities	2000 - 0500	Escalator replacement occurring within the station.
	These works are not expected to be noisy.		These works are not expected to be noisy outside of the station building.	
17 th to 23 rd February	2000 - 0500	Minor construction activities	2000 - 0500	Relocation of passenger information display units within the unpaid concourse
	These works are not expected to be noisy.		These works are not expected to be noisy outside of the station building.	
24 th February to 2 nd March	2000 - 0500	Minor construction activities	2000 - 0500	Construction begins on new ticket gate trenches.
	These works are not expected to be noisy.		Conducted at night to reduce the impact on commuters, these works may be audible outside of the station building. Noise monitoring will be undertaken to ensure this is managed effectively.	

**** Works subject to minor changes**

Keeping the community informed

The community will be kept informed with regular project notifications and information via the project website found at: www.transport.nsw.gov.au/edgecliff. For further information on the project, please call the Project Infoline on **1800 684 490** or email projects@transport.nsw.gov.au.
