Maintenance inspections
From July 2019

What we’re doing
The NSW Government’s More Trains, More Services program is adding new trains, upgraded infrastructure and hundreds of additional train services for Sydney. The uplift in services is needed to address the increase in rail patronage but will impact on our ability to conduct maintenance inspections in high traffic areas.
To ensure we continue to deliver a safe rail network, we will be changing the way we carry out some of our inspections and maintenance works.
Commencing July 2019, Sydney Trains will be carrying out this work at night, rather than between the morning and afternoon peaks.
We appreciate your support and understanding while we continue to maintain a safe, reliable network.

Maintenance inspections at night in your rail corridor
These routine inspections and minor maintenance works are not expected to disturb nearby residents. We will continue to notify you of upcoming major periodic maintenance.

How this affects you
Noise
- The increase in activity in the rail corridor at night is not expected to disturb nearby residents.
- The inspection work will involve the occasional use of hand-held power tools.
- Every effort will be made to minimise work vehicle movements to reduce noise.

Light
- Our staff will direct lights away from properties to minimise light pollution.

Parking
- Our staff may need to park work vehicles on local streets when space is limited within the rail corridor.

We apologise for any inconvenience and thank you for your cooperation during these essential works.
