Redfern Station Upgrade
New Southern Concourse
Consultation feedback and next steps
4 November 2019
Agenda

• Summary of consultation feedback
• Modified design following consultation
• Principles and concepts for shared zones
• Other issues raised in consultation
• Question & answer session
• Access to Platforms 11 and 12
• Next steps
Consultation and engagement process

Consultation on Little Eveleigh Street option (May & June 2019)

- Community meetings (RedWatch, South Eveleigh, Aboriginal community groups)
- Doorknocked Little Eveleigh St residents and met Watertower residents
- Over 20,000 newsletters distributed to properties within c.1km of station (south of Cleveland Street)
- Newsletters handed out to station users
- Online survey and project email (over 160 responses)
- Three pop up info sessions

Consultation on four design options (July and August 2019)

- Forum on 4 July (community groups and stakeholders)
- Community meetings (Reconnect Redfern, South Eveleigh and Alexandria Residents Action Group)
- Meetings with disability representative groups (ATAC and Council forum)
- Doorknocked Little Eveleigh St residents
- Over 20,000 new newsletters distributed (as above, plus East Chippendale)
- Newsletters handed out to station users
- Updated online survey and project email (over 260 responses)
Consultation on design options

Option 1 – Little Eveleigh Street connection

Option 2 – Wilson Street connection (at grade walkway)
Consultation on design options

Option 3 – Wilson Street connection (aerial walkway)

Option 4 – South Eveleigh to Wilson Street connection

Overall, respondents identified:
- Option 1 as the **most** preferred option
- Option 4 as the **least** preferred option
Following consultation and a review of feedback received, we’ve changed the approach of how the Little Eveleigh Street option ‘interacts’ with streets:

- Garden buffers and landscaping to separate properties from the shared zone
- Separation of pedestrians and cyclists via a paved (non-raised) cycleway
- On-street parking to be relocated nearby
- Through-traffic minimised with general traffic restrictions proposed
- Resident and trade/deliveries allowed 24 hours a day

Transport for NSW will work with local residents, Council, NSW Police and other stakeholders to design the streetscape and shared zone.
Selected design – modified Little Eveleigh Street option

Features:

- Six metre wide cross-corridor concourse
- Lifts and stairs from concourse to Platforms 1 to 10
- New station entrances at Little Eveleigh St and Marian St
- Shared zones on Little Eveleigh and Marian Streets to be designed with residents, Council, NSW Police and other stakeholders

Benefits:

- Layout provides direct route preferred by those with disability and those who are less mobile
- Preferred option by respondents based on feedback
- Shortest and most direct journey from platforms to streets
- Straight walkway design with clear wayfinding makes it easy for customers to navigate
- Perception of better personal safety by respondents
- Design to be future-proofed to integrate with potential development in the wider precinct
- Reduces congestion by separating lifts, stairs and ticket gates on concourse, improving safety
Selected design – modified Little Eveleigh Street option

Access considerations

<table>
<thead>
<tr>
<th>Access Type</th>
<th>Principles</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pedestrians</td>
<td>• 24hr access</td>
</tr>
<tr>
<td>Cyclists</td>
<td>• 24hr access and dedicated cycleway proposed</td>
</tr>
<tr>
<td></td>
<td>• Additional cycle parking to be provided</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>• 24hr access for residents / services (eg. garbage trucks) / emergency vehicles)</td>
</tr>
<tr>
<td></td>
<td>• Restrictions proposed on general vehicle access</td>
</tr>
<tr>
<td>Residents’ deliveries / trade</td>
<td>• 24 hr access</td>
</tr>
<tr>
<td>Street parking</td>
<td>• On-street parking spaces to be removed and relocated nearby (investigating option of TfNSW land at end Little Eveleigh St)</td>
</tr>
<tr>
<td></td>
<td>• No net loss of street parking spaces</td>
</tr>
<tr>
<td>Community buses</td>
<td>• Consideration for relocation of bus stop to Lawson St (corner Little Eveleigh St)</td>
</tr>
<tr>
<td>Kiss &amp; ride</td>
<td>• Consideration for locating on Lawson St (corner Little Eveleigh St)</td>
</tr>
</tbody>

## Key themes

<table>
<thead>
<tr>
<th>Key theme</th>
<th>Mitigation</th>
</tr>
</thead>
</table>
| Safety                     | • Pedestrian priority through signage and street treatments  
                               • Restrictions proposed on general vehicle access  
                               • Separation of cycleway from pedestrians through paving treatments proposed                                                                 |
| Privacy                    | • Landscape treatment to separate properties from shared zone                                                                                                                                              |
| Noise                      | • Studies to start shortly to assess existing background noise levels  
                               • Resident concerns to be considered during design                                                                                                                                                    |
| Lighting                   | • Low-spill lighting to be investigated                                                                                                                                                                      |
| Deliveries / trade visits  | • Opportunity for off-peak parking spaces to be considered during design                                                                                                                                   |
| Rubbish collection         | • Coordinate with City of Sydney on timing of rubbish collection  
                               • Bin bays to be incorporated into new design                                                                                                                                                          |
| Street character           | • Retain façade of 125-127 Little Eveleigh St and restore partial office space  
                               • New planting (including trees) and street furniture  
                               • Consider raingardens to filter stormwater                                                                                                                                                           |

Transport for NSW will work with local residents, Council, NSW Police and other stakeholders to design streetscape and shared zone
Reviewed and not progressed
‘Option 5’ (submitted by community members)

- Separate paid and unpaid customer sections
- Connection to both Marian St and South Eveleigh
- Interface with heritage building off Platform 1
- Increased bulk so more complex construction and visual impacts
- Complex wayfinding and cycle access
- Major infrastructure modifications required
- Ramp connections to Marian and Cornwallis Streets elongated to meet DDA requirements
Reviewed and not progressed
H-Design (submitted by community members)

- Ungated cross corridor access Connects to key destinations
- Minimises impacts to local streets
- Increased distance from station entries to platforms, bus & town centre connections
- Increased bulk so more complex construction and visual impacts
- Increased impact on station infrastructure
- Requires two footbridges
- Complex wayfinding
Other issues raised in consultation

<table>
<thead>
<tr>
<th>Themes</th>
<th>Response</th>
</tr>
</thead>
</table>
| Cross-corridor cycle access     | • Council’s new Lawson Street cycleway will provide safe, separated access across the rail corridor  
                                  | • Transport for NSW will seek to connect the concourse to the Council’s cycle network  
                                  | • Bike parking will be provided at both concourse entrances                                                                                  |
| Non-ticketed concourse access   | • Transport for NSW is looking at options for ungated access  
                                  | • Need to balance needs of general access, safety and revenue                                                                                 |
| Wider precinct plans            | • Transport for NSW is developing a vision for the Redfern North Eveleigh precinct  
                                  | • Community and stakeholder consultation in coming months on the vision and priorities for the precinct                                       |
| Platforms 11 & 12               | • Community and customer support for improved access to underground Platforms 11 & 12  
                                  | • More detail on Slide 18 (following questions)                                                                                             |
Questions?
Platforms 11 and 12

- Community and customer support for improved access to underground Platforms 11 & 12
- Transport for NSW is considering developing the land to the east of Redfern Station, above the underground T4 Eastern Suburbs and Illawarra Lines.
- This would facilitate improved access to the underground Platforms 11 and 12, which would make Redfern Station fully accessible.
- The development would also provide better place making outcomes and improved connections to the bus interchange on Gibbons Street.
- Any development would be constrained by existing zoning and height controls. This allows up to 14 storeys and for mixed use development.
Option - access to Platform 11 & 12

Artist's impressions only. Design and finishes are subject to consultation.
Next steps

• Publish Consultation Report for Southern Concourse on TfNSW website
• Lodge Scoping Report for New Southern Concourse with Department of Planning, Industry and Environment to start planning approval process
• Ongoing engagement with City of Sydney, local residents and stakeholders:
  • inform detailed design of New Southern Concourse
  • urban design of Little Eveleigh Street and Marian Street shared zones
  • develop construction plans that minimise community impacts
• Engagement on Platforms 11 & 12 to start in early 2020
• Environmental Impact Statement for New Southern Concourse on public exhibition mid 2020 with approval expected late 2020
• Construction to take around 18 months from planning approval
