Replacement of Gannons Road Bridge

March to July 2019

What we’re doing

Sydney Trains will replace Gannons Road Bridge with a wider structure to allow for future road widening of Gannons Road, between Kingsway and Denman Avenue, at Caringbah. While this work will involve short term disruption, it is regarded as an essential first step towards improved traffic flow and reduced road congestion. The new Bridge will allow for two lanes each way, plus shared pedestrian and cycle pathways on both sides of the road.

Enabling works

Site preparations will commence in December 2018, with enabling works scheduled for the weekends of 30-31 March and 13-14 April 2019. Work will continue around the clock during these two weekends.

Construction works

The construction works to replace the bridge are yet to be confirmed (tentatively scheduled for July 2019) with the duration of the works expected to be 8 days.

Work will take place around the clock both during the 30-31 March and 13-14 April weekend works and during the major construction period (tentatively scheduled for July 2019), with respite periods provided every three hours.

Traffic management plans are being developed as the enabling and construction works involve road closures. To limit the disruption caused by road and rail closures, Sydney Trains makes every effort to schedule them during off-peak periods such as during winter, weekends, and school holidays.

Plant, equipment and materials may be delivered to the worksite outside business hours due to travel restrictions on large vehicles.

Road closures

Partial road closures will be required during the March and April enabling works followed by a full road closure during the construction works. Street parking will be limited near the worksite. We apologise for any inconvenience and thank you for your cooperation during these essential works.

Further information on this project will be provided early in 2019.
