

Sutherland to Cronulla Active Transport Link

Project Update

December 2019

The Sutherland to Cronulla Active Transport Link (SCATL) is a pedestrian and bicycle path between Sutherland and Cronulla to help make walking and bike riding a more convenient, safer and enjoyable transport option.

Stage 1 Sutherland to Kirrawee will connect key destinations such as transport interchanges, schools, residential areas and business precincts.

Construction of Stage 1 is underway and will be completed progressively between Sutherland and Kirrawee. Parts of Stage 1 will open as work in each area finishes, with bike riders and pedestrians able to use the whole stage by early 2020.

Continuing work at Sutherland

Work will continue on Eton Street between McCubbens Lane and President Avenue, and along President Avenue between Merton Street and Belmont Street to complete the new pedestrian and bicycle path and landscaping in the area.

We are also beginning work along President Avenue between Auburn Street and Acacia Road. Work along this section includes excavating, concreting and landscaping, to continue building the new pedestrian and bicycle pathway. Please see the map overleaf for more detail.

Work will be completed during standard construction hours from **7am to 6pm, Monday to Friday**, and **8am to 1pm on Saturdays**.

Night work

Some work is required outside standard work hours to minimise impacts on local traffic and to improve the safety for pedestrians and workers. We will have partial closures and detours at McCubbens Lane and on President Avenue between Eton Street and Merton Street and Auburn Street.

We will require **six night shifts** between **Tuesday 10 December** and **Friday 20 December**, from **6pm and 5am** (weather permitting), to complete the path from Eton Street into President Avenue. We will also be completing the line marking of the new shared bicycle and pedestrian crossings on Eton Street, Merton Street and Auburn Street.

Residents in close proximity to the night work will be provided with detailed information closer to the time.

This work may be noisy at times, as it includes truck movements, excavating, line marking, concreting and asphaltting. We will implement measures to minimise impacts on the community by completing noisier works as early as possible, switching off equipment when it is not being used, placing equipment as far away from properties as possible, and monitoring our work activities to ensure noise levels are being managed effectively.

Changes to parking

Approximately 10 parking spaces on President Avenue between Merton Street and Glencoe Street are temporarily unavailable until **Sunday 22 December 2019**, to allow work to be completed safely.

We have also permanently removed approximately 14 parking spaces on Eton Street between McCubbens Lane and President Avenue, and 2 parking spaces on Auburn Street to create the new bicycle path. Alternate parking is now available on President Avenue between Eton Street and Merton Street.

Traffic changes

Pedestrian access will be maintained at all times, with traffic control present when work is in progress.

There will be temporary traffic changes during our work hours to ensure the work zone is safe. Lane closures and detours may be in place during our work which may affect travel times. Please keep to the speed limits and follow signs and traffic controllers' directions.

Keeping the community informed

We will be conducting ongoing landscaping and maintenance work along the new pathway until the completion of the project in January 2020.

We will keep the community informed of upcoming work via regular notifications and updates on our website. If you would like to speak to the project team about this work, please contact us on 1800 684 490 or email projects@transport.nsw.gov.au.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **(02) 9200 0200**. The interpreter will then assist you with translation.
