Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**Weekend work**

**From 6am Saturday 13 July to 6pm Sunday 14 July**, we will be working within the rail corridor between Anzac Avenue, Wyong and Johnson Road, Tuggerah to install overhead wires, overhead wire structures and safety screens. Tree trimming and removal will also be required along Panonia Road and Pacific Highway, Wyong subject to approval.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during the weekend works. Please contact Transport Info on 131 500 or visit transportnsw.info for more information about replacement bus services.

**Waterway and road diversions**

**On Saturday 13 July 2019, between 12pm and 6pm for approximately two hours**, there will be no access under the rail bridge for boats on the Wyong River and traffic on some local roads.

During the two hour period the following traffic changes will be in place (see map over the page):

- Detours around Panonia Road, Wyong, which will be closed between the intersection of River Road and Howarth Street.
- Delays may be experienced on South Tacoma Road, Tuggerah which will be closed. Traffic controllers will guide motorists and periodically open the road during the two hour period.

These temporary traffic impacts are essential for the safety of pedestrians, residents and watercraft in the river while the overhead wires on the rail bridge are removed and replaced. Water police will be in place to guide watercraft and ensure no boats pass under the bridge during works. Traffic control, signage and electronic signboards will also be in place to assist motorists and pedestrians.

**Construction equipment**

Equipment to be used includes cherry pickers, wood chipper, chain saw, crane truck, cable winch, light towers, work vehicles, various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
Keeping the community informed
If you would like to speak with the project team about these works, please contact us through the details provided below. Thank you for your understanding during this work.
