

Power Supply Upgrade Program

Tascott

COMMUNITY NOTIFICATION

JULY 2019

Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains.

Weekend work

From 6am Saturday 13 July to 6pm Sunday 14 July, we will be working within the rail corridor between Tascott Station and Takari Avenue, Point Clare to install overhead wire structures.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend works. Please contact Transport Info on **131 500** or visit **transportnsw.info** for more information about replacement bus services.

What you may notice

From Tuesday 9 July between 7am and 6pm, temporary site facilities will be delivered into the rail corridor via the access gate off Glenrock Parade, Tascott.

Temporary removal of car parking spaces – Point Clare Station

From 3pm Thursday 11 July to 3pm Friday 12 July, approximately 10 parking spaces within the Point Clare Station Commuter Car Park, adjacent to Brisbane Water Drive, will be temporarily unavailable to allow overhead wire structures to be delivered and stored prior to the weekend work.

From 3pm Friday 12 July to 6pm Sunday 14 July, the Point Clare Station Commuter Car Park will be closed for the weekend works. This will allow the installation of the overhead wire structures over the weekend.

Traffic management

From Tuesday 9 July to Sunday 14 July, temporary traffic control will be in place at 6 rail corridor access gates to allow plant and equipment in and out of the rail corridor. These gates are located within the Point Clare Commuter Car Park, along Brisbane Water Drive, Glenrock Parade and Kurrawa Avenue, Point Clare.

Traffic delays may be experienced at times. Please allow additional time to travel through the area. Traffic controllers will be in place to provide directions to motorists and pedestrians.

Construction equipment

Equipment to be used includes cherry pickers, excavator, watercart, street sweeper, a generator, vacuum truck, light towers, work vehicles, various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

Keeping the community informed

If you would like to speak with the project team about these works, please contact us through the details provided below. Thank you for your understanding during this work.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **(02) 9200 0200**. The interpreter will then assist you with translation.
