Killara Cutting Stabilisation Upgrade
From Saturday 16 November 2019 to Sunday 17 November 2019

What we’re doing

Sydney Trains are undertaking cutting stabilisation works within the rail corridor between Killara Station and Treatts Road from Saturday 16 November to Sunday 17 November. Please refer to the map for the location of the worksite.

This work is essential to reduce the risk of rocks, vegetation or trees falling onto trains or the track, which could cause injury to customers, damage to trains and infrastructure, and major disruption to rail services.

The work involves the removal of vegetation and loose rock on the cutting face. No mature trees will be removed during this work. Note that all the required environmental approvals have been obtained and relevant environmental guidelines will be followed.

How this affects you

Noisy work

- Work will take place between 6am and 6.30pm on Saturday 16 November to Sunday 17 November 2019.
- Residents can expect to hear noise associated with rock breaking. Equipment will include a wood chipper, chainsaw, compressor and hydraulic rockbreaker.
- We aim to minimise noise where possible by: scheduling noisy work during less sensitive time periods, implementing 1-hour respite periods after every 3-hour period of noisy activities, and turning equipment off when not in use.

Traffic and Parking

- Work vehicles will access the rail corridor via a gate on Treatts Road and Culworth Avenue. Equipment may be delivered to the worksite outside of the above working times. While we park our vehicles within the rail corridor where possible, street parking near worksites may be reduced.

We apologise for any inconvenience and thank you for your cooperation during these essential works.
