Transport Access Program
Glenbrook Station Upgrade

Community Notification

February 2019

Project update

The Transport Access Program is a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, secure and integrated transport infrastructure.

This month, work on the Glenbrook Station will start with site establishment beginning in late January. Upcoming work in February will include:

- on-going site establishment
- relocation of electrical services
- vegetation removal
- excavation for the lift pit
- vegetation removal
- excavation for the lift pit
- piling and concrete work for the new walkway on Burfitt Parade
- installation of fencing and hoarding along Burfitt Parade

A piling rig will be temporarily located on the westbound lane of Burfitt Parade beside the pedestrian crossing, for a period of four days between Monday 18 February to Thursday 28 February 2019. During this time, pedestrian access to the station will be diverted and Burfitt Parade westbound lane will be closed. Traffic management and signs will be in place to assist motorists and pedestrians with the changed conditions.

Location of work area on Burfitt Parade
**Upcoming weekend and night work**

In February, weekend and night work will be undertaken in addition to standard hours to ensure the safety of workers, pedestrians and motorists. From **2am Saturday 16 February to 2am Monday 18 February** construction equipment will be transported onto the station platform and excavation activities, vegetation removal, service relocation and installation of fencing and hoarding will be carried out.

Equipment to be used includes excavators, chain saw, wood chipper, concrete saw, construction vehicles and hand tools.

Minimising impact to existing vegetation has been a fundamental consideration during design development. Some vegetation removal will be required to facilitate construction of the new accessible path from Burfitt Parade to the station, and additional details can be found in the project Determination Report at [transport.nsw.gov.au/glenbrook](http://transport.nsw.gov.au/glenbrook). A qualified ecologist will undertake an assessment and recommend mitigation measures for implementation prior to any vegetation removal.

Some of the work may be noisy and we try to reduce the impacts where we can. Noise mitigation measures include:

- only using noisy machinery when there are no other alternatives
- scheduling noisier work during daylight and early evening hours
- turning off machinery when not in use.

These works will be undertaken during a scheduled Sydney Trains shutdown period when no trains will be running and pedestrian access to the station will be closed during this time. Please visit [transportnsw.info](http://transportnsw.info) or call **131 500** for up to date information regarding train services at this time.
Standard working hours

Standard work hours are between **7am to 6pm, Monday to Friday** and **8am to 1pm Saturdays**.
