

Transport for NSW

# Help us create a better bus network for Bathurst

## Have your say

The NSW Government is committed to creating better bus services for regional communities, by improving bus networks, timetables and the customer experience.

Transport for NSW's 16 Regional Cities Services Improvement Program aims to identify gaps and opportunities around how bus services operate, so we can deliver improvements to better meet community needs.

Improvements could include changes to existing journeys, new routes or services, extended operating hours across the day or week, and better connections to key destinations such as hospitals, TAFEs and universities.

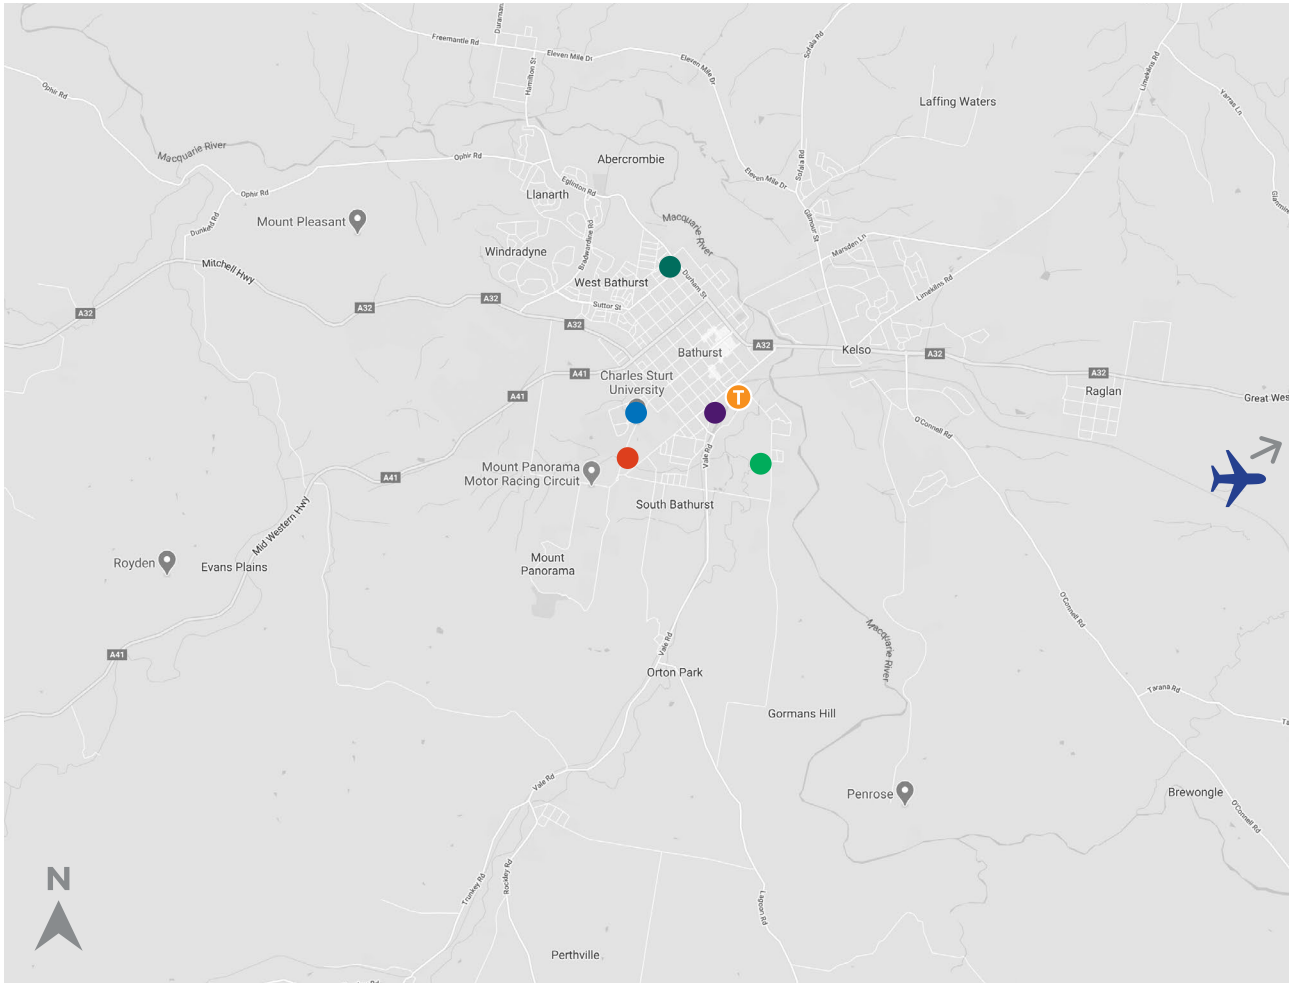

We are now seeking feedback from public transport users and the wider community in the Bathurst area about how the local bus network is used, and service needs and desires. This will inform future planning to help create a better bus network for Bathurst.

We will keep the community informed about any decisions and expect to implement changes in early 2021.
