COMMUNITY NOTIFICATION  AUGUST 2020

Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

Upcoming activities
During August we will continue upgrading electrical equipment within the substation at Strathfield Station. Most work will occur between 7am and 6pm, Monday to Friday.

What you may notice
Access to the substation is via the walkway behind the Everton Road bus stops. For the safety of customers and workers, a temporary site compound has been set up on the station access ramp. This requires the temporary closure of the bike rack and stair access behind Bus Stands C and D. Bus services will not be affected by this work.

Equipment will be delivered from Everton Road adjacent to Bus Stand A. When deliveries occur, traffic controllers will safely guide pedestrians and motorists around delivery vehicles.

A backup power generator is also in place and will be used if required.

Weekend and night work
From 6am to 6pm on Saturday 25 and Sunday 26 July, we will remove redundant equipment from the substation via the station entrance adjacent to Everton Road. Work vehicles may park in the Kiss and Ride area for up to ten minutes during equipment removal. Traffic controllers will safely guide motorists and pedestrians around the equipment.

This work will occur during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

From 6pm to 6am, on two nights between Monday 10 and Friday 14 August, we will be working inside the rail corridor to lift a concrete base and new electrical equipment into the substation area.
Construction equipment
Equipment to be used includes cherry pickers, excavators, plate compactor, jack hammer, crane trucks, lighting towers, work vehicles, various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
