

Automatic Train Protection

Wentworthville

COMMUNITY NOTIFICATION

November 2020

Transport for NSW is boosting safety across the electrified rail network by delivering new Automatic Train Protection (ATP) technology.

Project overview

ATP will make the train network safer and more reliable by ensuring trains operate within the permitted speed limit.

The technology will provide real-time speed and signal information to train drivers. The system includes:

- installation of electronic equipment on rail lines to continually monitor train speed
- installation of electronic equipment on suburban and Intercity trains which provides information on the train's speed, distance and direction.

ATP is being rolled out across the Sydney Trains and NSW TrainLink electrified network.

Upcoming activities at Wentworthville

Between **7am Saturday 21 November and 2.30am Sunday 21 November**, we will be working inside the rail corridor at Wentworthville.

During the day on Saturday, we will remove vegetation inside the rail corridor, including one juvenile eucalyptus tree and a three-metre section of bamboo (subject to approval). The removal of the vegetation will ensure the train signage is visible.

On Saturday night and early Sunday morning, we will be installing train driver signage inside the rail corridor.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on **131 500** or visit **transportnsw.info** for information about replacement bus services.

What you may notice

We will remove vegetation using a rail track vehicle and wood chipper, along with various hand and power tools. The train signage will be installed using hand tools.

Traffic control will be in place on Emert Street, near the corner of Stapleton Street, to ensure the safe delivery of equipment to and from the site. Our crews will park their vehicles at Wentworthville Swimming Centre, which is temporarily closed for renovations.

All work activities will occur within the rail corridor, with workers accessing the corridor via access gates on Emert Street and on Wentworth Avenue near Sheehan Street.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
