

Automatic Train Protection

Emu Plains

COMMUNITY NOTIFICATION

September 2020

Transport for NSW is boosting safety across the electrified rail network by delivering new Automatic Train Protection (ATP) technology.

Project overview

ATP will make the train network safer and more reliable by ensuring trains operate within the permitted speed limit.

The technology will provide real-time speed and signal information to train drivers. The system includes:

- installation of electronic equipment on rail lines to continually monitor train speed
- installation of electronic equipment on suburban and Intercity trains which provides information on the train's speed, distance and direction.

ATP is being rolled out across the Sydney Trains and NSW TrainLink electrified network.

Upcoming activities at Emu Plains

Between **7am and 6pm on Saturday 12 and Sunday 13 September**, we will be installing new train signage. Tree trimming and removal will also occur adjacent to the tracks as part of this work.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on **131 500** or visit **transportnsw.info** for information about replacement bus services.

Between 7am and 6pm from Thursday 10 to Monday 14 September, equipment and materials will be delivered and removed via the rail access gates on Banjo Crescent and Bromley Road, Emu Plains.

What you may notice

All work activities will occur within the rail corridor, with workers accessing the corridor via access gates at Banjo Crescent and Bromley Road, Emu Plains.

Equipment to be used includes excavators, chainsaws, work vehicles and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
