More commuter parking at Edmondson Park Station is on the way

Transport for NSW is pleased to announce that plans for a new multi-storey commuter car park are approved.

The car park will provide up to 1,000 additional spaces to the south of Edmondson Park Station and is the first step in delivering up to 2,000 additional parking spaces.

Thank you to everyone who provided feedback on the concept design earlier this year. We received community support for the project and will continue to progress the additional parking as quickly as possible.

Your feedback was considered in the development of the Review of Environmental Factors (REF), the formal planning document for this project, and will help us to refine the design of the car park in the coming months. You can download the report at www.transport.nsw.gov.au/edmondsonpark

What's next?

Work will begin on detailed design soon and major construction of the new facility is due to start mid-year. The car park is expected to be complete and open to the community in mid-2021.

Transport for NSW will continue to work with key stakeholders to finalise plans for the remaining car parking spaces and more information will be shared with the community soon.

Parking during construction

During construction, the existing southern car park will be closed to allow construction of the multi-storey car park to be completed safely.

Alternative parking will be available for the community to offset the unavailable spaces and more information will be provided shortly.

Your questions answered

We received lots of questions and feedback during the community consultation period between **26 March and 10 April 2020**. Some of the questions raised have been addressed below.

Q: Will parking be free?

A: Parking in the multi-storey car park will be free for commuters for up to 18 hours when they tap on to a connecting public transport trip with their Opal Card. The existing northern at-grade car park will remain free and untimed as it is now.

Q: Why was this location selected?

A: The location is in close proximity to the station, providing convenient access to public transport as well as increased commuter connectivity to the town centre for access to the future shopping, dining and entertainment facilities.

It also provides opportunities to integrate with and enhance the town centre as it develops, as the car park will be designed in a way that enables alternative future uses such as community or retail spaces on the ground floor.

Responses to the feedback we received on the concept plans can be viewed in the REF and Determination Report. These reports and more frequently asked questions can be downloaded at www.transport.nsw.gov.au/edmondsonpark

Q: Will construction be delayed due to COVID-19?

A: We are continuing to deliver projects across NSW while ensuring the safety of all staff and the community. In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed. Construction is on track to begin mid-year and is expected to be complete in mid-2021.

Q: Are there any plans to help prevent traffic congestion in the area?

A: Modifications to the local road network will help improve traffic flow in and around the station precinct and provide motorists with multiple options for accessing the station and car park.

Keeping you up to date

We will continue to keep you informed about the project through notifications to customers, local residents and businesses, and frequent updates published at www.transport.nsw.gov.au/edmondsonpark. If you would like to be added to the project distribution list, please contact us on **1800 684 490** or email projects@transport.nsw.gov.au.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **(02) 9200 0200**. The interpreter will then assist you with translation.
