Power Supply Upgrade Program
Surry Hills to Central Station Feeder Upgrade

COMMUNITY NOTIFICATION

Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

A new power supply cable will be installed between the Ausgrid Substation in Ann Street, Surry Hills and the Chalmers Street Substation at Central Station. Novo Rail is delivering the project on behalf of Transport for NSW.

Upcoming construction activities

Between 7am and 6pm on Wednesday 8 and Thursday 9 April, we will be working on the southern side of Albion Street, between Commonwealth and Bellevue Streets, to undertake minor road restoration within the parking lane.

What you may notice

Temporary road impacts

A temporary lane closure will be in place between 10am and 3pm on Wednesday 8 and Thursday 9 April on Albion Street, between Commonwealth and Bellevue Streets, while the work is carried out.

Up to eight car parking spaces on Albion Street will be temporarily unavailable during this time.

Construction equipment

Equipment to be used during the work activities includes excavators, concrete truck, concrete pump, compactor, work vehicles and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

Keeping the community informed

If you would like to speak with the project team about this work, please contact us through the details provided below. We thank you for your patience as we undertake this important work.
