

Commuter Car Park Program Leppington

Artist's impression of the new commuter car park, subject to detailed design

More commuter parking at Leppington Station is on the way

Transport for NSW is pleased to announce that plans for a new multi-storey commuter car park with up to 1,000 additional spaces at Leppington Station are now approved.

Thank you to everyone who provided feedback on the concept design and to those who attended our community information sessions in March 2020.

We received widespread community support for the project and will continue to progress the additional parking as quickly as possible.

Your feedback was considered in the development of the Review of Environmental Factors (REF), the formal planning document for this project, and will help us to refine the design of the car park in the coming months. You can download the report at www.transport.nsw.gov.au/leppington

What's next?

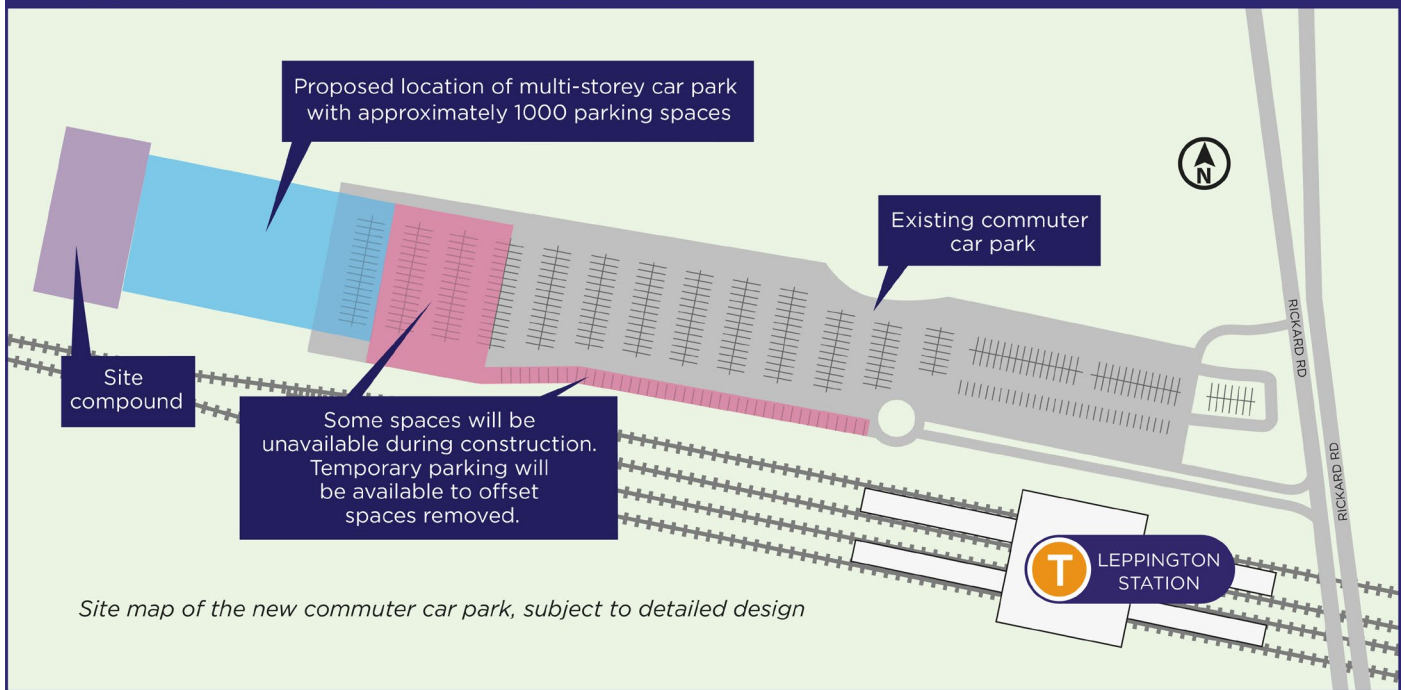

Work will begin on the detailed design soon and major construction of the new multi-storey car park is due to start mid-year. The new car park is expected to be complete and open to the community in mid-2021 providing up to 1000 additional spaces for customers. We will continue to keep you informed of progress in regular updates.

Temporary parking arrangements

During construction, some spaces in the existing northern car park will be unavailable in order to complete the work safely and alternative temporary parking will be available to offset these spaces.

Transport for NSW is finalising plans for the temporary car park and more information will be shared with the community soon.

Your questions answered

Thank you for all of your questions and feedback during March. Some of the questions raised have been addressed below.

Q: Will parking be free?

A: Parking in the multi-storey car park will be free for commuters for up to 18 hours when they tap on to a connecting public transport trip with their Opal Card. The existing southern car park will remain free and untimed as it is now.

Q: Will there be motorcycle parking?

A: Motorcycle parking is being assessed as part of the detailed design process.

Q: Will there be digital displays to show available parking?

A: Digital displays showing the number of available spaces within the car park in real time will be considered during detailed design as part of Transport Park&Ride.

Q: Will Edmondson Park receive more commuter parking?

A: Planning is underway to deliver up to 2,000 additional commuter car parking spaces at Edmondson Park Station.

Responses to the feedback we received on the concept plans can be viewed in the REF and Determination Report. These reports and more frequently asked questions can be downloaded at www.transport.nsw.gov.au/leppington.

Keeping you up to date

We will continue to keep you informed about the project through notifications to customers, local residents and businesses, and frequent updates published at the project webpage.

If you would like to be added to the project distribution list, please email projects@transport.nsw.gov.au and we will email you updates as the project progresses.

Commuter Car Park Program

The Commuter Car Park Program is a NSW Government initiative to provide you with more convenient access to public transport at key transport interchanges, and help ease congestion on our roads. We have already delivered more than 10,000 commuter car spaces across Sydney since 2011, with around 8,000 additional spaces on the way.
