Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**Weekend work**

We will be working beside the rail lines adjacent to Riou Street, Gosford between 4am Saturday 25 and midnight Monday 27 July to install new overhead wires and structures. We will also remove redundant rail infrastructure.

Traffic controllers will be in place at the rail gate on Riou Street, Gosford to manage the safety of pedestrians when equipment is moved in and out of the rail area.

**From 4am Saturday 25 to 8pm Sunday 26 July**, there will be a number of parking spaces temporarily closed on the top floor of the Gosford Commuter Car Park (adjacent to Showground Road). Light towers will be installed in the car park to light the work area.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

**What you may notice**

**Between 7am and 6pm on Monday 20 and Friday 24 July**, temporary site facilities and equipment will be delivered via the rail gate on Riou Street, Gosford. We will also access the rail lines at Glenrock Parade, Tascott, to deliver and remove material and equipment **between Monday 20 and Friday 31 July**.
Construction equipment

Equipment to be used includes cherry pickers, cranes, crane trucks, excavators, jackhammers, winches, lighting towers, work vehicles, and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are managed effectively.
