Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

What you may notice

Between 7am and 6pm on Thursday 14 and Friday 15 May, temporary site facilities and materials will be delivered into the rail corridor via the rail gates on Hobart and Glossop Streets, St Marys, and through the Endeavour Energy substation at the corner of Kurrajong and Boronia Roads, North St Marys.

Weekend work

Between 2.30am Saturday 16 and 4am Monday 18 May, we will be working inside the rail corridor to install and adjust overhead wires between St Marys Station and Mount Druitt Station. We will also install safety screens on the Glossop Street bridge near St Marys Station.

Access into the rail corridor will be via the rail gates on Hobart and Glossop Streets, St Marys.

Traffic changes

There will be a lane closure on Glossop Street, St Marys and intermittent lane closures between 9.30pm and 5.30am from Thursday 14 to Tuesday 19 May for up to 5 minutes to allow plant and machinery to be delivered and removed. Traffic delays may be experienced. Traffic control and electronic sign boards will direct motorists and pedestrians.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.
Map of the work area

Construction equipment

Equipment to be used includes cherry pickers, winch, crane trucks, trucks, generators, lighting towers, work vehicles and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

Keeping the community informed

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your understanding during this work.
