

Transport Access Program

Pymble Station Upgrade

SITE INVESTIGATIONS

October 2020

Planning is underway for an accessibility upgrade at Pymble Station. The upgrade will be delivered as part of the Transport Access Program, an initiative to provide a better experience for public transport customers by delivering modern, safe and accessible infrastructure.

As part of the planning process, preliminary investigations including geotechnical investigations and site surveys are required in order to further progress the project design.

Site investigations

Site investigations will be carried out from **Wednesday 21 October to Tuesday 27 October 2020** and will include the following:

- drilling investigative boreholes
- topographical and design surveys
- identifying services.

Equipment to be used includes a small drilling rig, a vacuum truck, powered hand tools and surveying equipment. Most of the work will be carried out between **7am and 6pm Monday to Friday**.

Some of the work will be carried out between **6am and 10pm Saturday 24 October and 6am and 6pm Sunday 25 October**, during a scheduled Sydney Trains trackwork weekend, when trains do not run and the station is closed. This work needs to be undertaken while trains are not running to ensure the safety of workers and customers.

Wherever possible, measures to reduce noise will be implemented including turning equipment off when not in use, positioning equipment as far away from residences as possible, monitoring noise, using non-tonal reversing beepers and stopping work for respite periods.

We apologise for any inconvenience and thank you for your patience during this important work.
