Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**Upcoming work**

We will be installing new equipment inside the West Ryde Substation. This work will occur between **10pm Tuesday 30 June to 6am Wednesday 1 July**.

Access to the substation will be via the gate located on West Parade, West Ryde.

**What you may notice**

Equipment to be used during the work will include power and hand tools. Higher noise generating work involving power tools is only expected to occur for short periods.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

**Keeping the community informed**

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your understanding during this work.
