Power Supply Upgrade Program
Strathfield

COMMUNITY NOTIFICATION
JULY – AUGUST 2020

Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

Upcoming activities
From Monday 6 July we will be upgrading an electrical transformer within the substation at Strathfield Station. Access to the substation is via the walkway behind the Everton Road bus stops.

Upgrade work will take place during the next two months, with most work occurring between 7am and 6pm, Monday to Friday.

What you may notice
For the safety of customers and workers, a temporary site compound will be established behind the bus stands on the station access ramp. This requires the temporary closure of the bike rack and stair access behind Bus Stands C and D. Bus services will not be affected by this work.

Equipment will be delivered from Everton Road adjacent to Bus Stand A. When deliveries occur, traffic controllers will safely guide pedestrians and motorists around delivery vehicles.

Weekend and night work
From 6am to 6pm on Saturday 11 and Sunday 12 July, we will carry out underground service investigations within the substation. A vacuum truck will be parked at the end of the Everton Road bus zone to undertake this work.

From 6am to 6pm on Saturday 25 and Sunday 26 July, we will be removing redundant equipment from the substation via the station entrance adjacent to Everton Road. Work vehicles may park in the Kiss and Ride area for up to 10 minutes to remove equipment. Traffic controllers will safely guide motorists and pedestrians around the machinery.

This work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

For more information call 1800 684 490,
Email projects@transport.nsw.gov.au or visit transport.nsw.gov.au/projects
For urgent enquiries or complaints regarding construction activities, please call 24 hours 1800 775 465
From 6pm to 6am, on two nights between Monday 10 August and Friday 14 August, we will be working inside the rail corridor. Work will involve lifting the concrete base and new electrical transformer from the rail tracks into the substation area.

**Construction equipment**

Equipment to be used includes cherry pickers, excavators, vacuum trucks, plate compactor, jack hammer, crane trucks, lighting towers, work vehicles, various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

**Keeping the community informed**

If you would like to speak with the project team about this work, please contact us on the details provided below. Thank you for your understanding during this work.
