

# Redfern Station Upgrade

## New Southern Concourse

### COMMUNITY NOTIFICATION

MARCH 2020

The Redfern Station Upgrade – New Southern Concourse will provide a station that is accessible to those with a disability, limited mobility, parents / carers with prams and customers with luggage.

### Investigation activities in your area

In March, investigation activities including topographic surveys, service identification and traffic surveys will be carried out in Redfern Station and on adjacent local streets.

These investigations will include:

- **From 7am to 6pm Monday 2 March to Friday 6 March 2020**, service investigations and 3D topographic surveys of roads, pavements and Sydney Trains land adjacent to Redfern Station
- **From Wednesday 4 March to Sunday 9 March 2020**, traffic surveys of Little Eveleigh, Marian, Ivy and Lawson Streets using survey cameras. Cameras will be positioned so that they **do not** face residences.
- **From 8pm to 6am Monday 9 March to Friday 13 March 2020**, service investigations and 3D topographic surveys of Redfern Station platforms.

Every effort will be taken to complete these activities within the timeframes shown above. However in case of external factors such as inclement weather, these activities may extend until Friday 27 March. A map of the work area (Figure 1) is provided on the next page.

These surveys will provide information to help inform the planning and design process and to help us better understand existing conditions such as the number of vehicles, cyclists and pedestrians using these streets.

While the resolution of the traffic cameras is enough to distinguish the shapes of vehicles, cyclists and pedestrians, identifying features such as faces and number plates will not be able to be distinguished. An example of the imagery quality (Figure 2) and typical traffic survey cameras (Figure 3) can be seen on the next page.

### What you may notice

These investigations are not expected to be noisy as minimal equipment will be used, including land surveying equipment, traffic survey cameras, hand tools to remove and replace pit lids, a scanning wand, line marking paint and work vehicles.

If you would like to speak with the project team about this work, please contact us by calling **1800 684 490** or by emailing us at **projects@transport.nsw.gov.au**.
