

Redfern Station Upgrade

New Southern Concourse

COMMUNITY NOTIFICATION

October 2020

The Redfern Station Upgrade – New Southern Concourse will provide a station that is accessible to those with a disability, limited mobility, parents / carers with prams and customers with luggage. The New Southern Concourse will improve accessibility to public transport and help people move around the growing area and is the first step in the renewal of the Redfern North Eveleigh Precinct.

October update

Minor work continues at Redfern Station to inform the design of the station upgrade. We are also taking this opportunity to undertake service searching and investigation work, and saw cutting of the platform areas prior to weekend works. These work activities will primarily be located within the rail corridor and undertaken during standard construction hours 7am to 6pm Monday to Friday and 8am to 1pm Saturday.

During October and November, you may notice people accessing 125 – 127 Little Eveleigh Street. Investigation work is required within the building as part of the design process. Access will occur during the standard construction hours listed above.

Upcoming weekend and night work

In addition to activities during standard working hours, some weekend and night work will occur in October during a scheduled trackwork weekend. The table below provides up-to-date details about this work.

Dates	Work hours	Location	Activities
Saturday 17 and Sunday 18 October	4am Saturday to 11pm Sunday	Platform 1, 8 and 9	Excavate cable routes within the platforms and install conduits. Minor excavation to identify services within the platforms. Backfill and compact the excavated areas.
		Platform 10	Excavate and install conduits for new cable routes and services within the platform. Backfill and compact the excavated areas. Pedestrian access to Platform 10 will not be available on this weekend.

			Traffic control and pedestrian detour signs will be in place to direct customers via Gibbons Street.
Saturday 17 and Sunday 18 October	4am Saturday to 11pm Sunday	Rail corridor – north and south of the Redfern Station platforms	Investigate underground services within the rail corridor and adjacent to the tracks.

What you may notice

In advance of the work listed above, plant and equipment will be delivered into the rail corridor via various rail access gates in Redfern and Eveleigh. Heavy vehicles will be using local streets to access the rail corridor, including Gibbons Street, Carriageworks Way and Little Eveleigh Street. Some deliveries may occur at night due to day time travel restrictions on large vehicles.

Equipment to be used during the work includes flatbed crane trucks, excavators, dump trucks, vacuum trucks, concrete saw, concrete trucks, concrete pumps, compactors, lighting towers, generators, work vehicles, hand and power tools. The concrete truck and concrete pump will operate over the weekend from the Sydney Trains car park at the corner of Rosehill and Marian Streets.

For the safety of staff and customers this work needs to be completed during scheduled trackwork weekends when trains are not running. For up-to-date information about services during these times visit transportnsw.info or call **131 500**.
