Power Supply Upgrade Program
Doonside

COMMUNITY NOTIFICATION JANUARY 2020

Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**Weekend work**

**Between 6am and 6pm on Saturday 18 and Sunday 19 January,** we will be working inside the rail corridor to install overhead wire brackets between Correa Close, Woodcroft and Crawford Road, Doonside.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

**What you may notice**

Access into the rail corridor will be via the rail gates on Coghlan Crescent and Doonside Crescent, Doonside (near Graham Street).

**Construction equipment**

Equipment to be used includes cherry pickers, lighting towers, excavator, work vehicles and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

**Keeping the community informed**

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your understanding during this work.
