Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**Weekend work**

Between 6am and 6pm Sunday 19 January, we will be working inside the rail corridor to adjust overhead wires between Seven Hills Station and Blacktown Station. Access into the rail corridor will be via the rail gates on Federal Road, Seven Hills and on Railway Parade, Blacktown.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

**Construction equipment**

Equipment to be used includes cherry pickers, work vehicles and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.

**Keeping the community informed**

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your understanding during this work.
