Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

What you may notice

Between 3pm Thursday 16 and 3pm Monday 20 January, approximately 20 spaces in the car park on The Kingsway will be closed to establish a temporary site compound for weekend rail work (see map over page).

There will be a partial lane closure on Dunmore Street, Wentworthville between 2am and 5am on Saturday 18 and on Monday 20 January to enable machinery to be delivered and removed.

Weekend work

Between 6am and 6pm on Saturday 18 and Sunday 19 January, we will be working inside the rail corridor to install safety screens and adjust existing overhead wires. We will also excavate and construct concrete footings for new overhead wire structures.

Access into the rail corridor will be via the rail gates located on The Kingsway and Wentworth Avenue, Wentworthville (near Railway Street).

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

Construction equipment

Equipment to be used includes cherry pickers, vacuum truck, excavator, concrete pump, concrete truck, work vehicles and various hand and power tools.
Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
