Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**What you may notice**

**Between 7am and 6pm on Thursday 7 and Friday 8 May,** temporary site facilities and materials will be delivered into the rail corridor via the rail gate on Fifth Avenue, Canley Vale.

**From 4am Thursday 7 to 6pm Tuesday 12 May,** there will be a partial closure of the Warwick Farm Commuter Car Park to establish a temporary site compound for the weekend rail work.

**Weekend work**

**Between 6am and 8pm on Saturday 9 and Sunday 10 May,** we will be working inside the rail corridor to install and adjust overhead wires between Canley Vale Station and Liverpool Station.

Access into the rail corridor will be via the gates on Carcoola Street, Canley Vale and Station Street, Warwick Farm.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

**Construction equipment**

Equipment to be used includes cherry pickers, winch, crane truck, trucks, generators, lighting towers, work vehicles and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
Keeping the community informed

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your understanding during this work.
