Transport for NSW is upgrading electrical infrastructure as part of the Power Supply Upgrade Program, which is designed to meet expected power requirements for Sydney’s future rail network and new fleet of air-conditioned trains.

**Upcoming activities**

**Between 6pm Saturday 6 and 6am Sunday 7 June,** we will be working inside the rail corridor to remove overhead wire structures and footings.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on 131 500 or visit transportnsw.info for information about replacement bus services.

**Traffic changes**

**From 6pm Saturday 6 to 6am Sunday 7 June,** one southbound lane on the Old Pacific Highway will continue to be closed. Traffic control will be in place to direct motorists and cyclists safely around the work site.

**Construction equipment**

Equipment to be used includes cherry pickers, generators, excavators, lighting towers, work vehicles, and various hand and power tools.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
Keeping the community informed

If you would like to speak with the project team about this work, please contact us through the details provided below. Thank you for your understanding during this work.
