

# Automatic Train Protection

## Berala

COMMUNITY NOTIFICATION

May 2021

Transport for NSW is boosting safety across the electrified rail network by delivering new Automatic Train Protection (ATP) technology.

### Project overview

ATP will make the train network safer and more reliable by ensuring trains operate within the permitted speed limit.

The technology will provide real-time speed and signal information to train drivers. The system includes:

- installation of electronic equipment on rail lines to continually monitor train speed
- installation of electronic equipment on suburban and Intercity trains which provides information on the train's speed, distance and direction.

ATP is being rolled out across the Sydney Trains and NSW TrainLink electrified network.

### Upcoming activities at Berala

Between **9pm and 5.30am on Tuesday 11 and Wednesday 12 May** we will be installing train driver signage inside the rail corridor at Berala, weather permitting.

Access to the rail corridor will be via the gate off Campbell Street. A map showing the work area and access gate is overleaf. There will be no traffic impacts as a result of this work.

To ensure the safety of our customers and staff, this work will be completed during a scheduled Sydney Trains trackwork weekend. Train services will be affected during weekend work. Please contact Transport Info on **131 500** or visit **transportnsw.info** for information about replacement bus services.

### What you may notice

Equipment used during the work activity will include hand tools such as shovels and picks as well as mixing equipment for laying concrete. All work will occur inside the rail corridor.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
