

Transport Access Program

Petersham Station Upgrade

Project completion

September 2021

Petersham Station Upgrade is now complete and the community is able to use the station's new and improved accessibility features, including:

- two new lifts to access all platforms and amenities
- an upgraded family accessible toilet and ambulant toilet
- CCTV and lighting improvements to increase safety and security around the station precinct
- one new accessible parking space and kiss and ride area on Terminus Street.

The project was completed as part of the Transport Access Program, a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure.

Key facts

733 workers used on the project

51,499 hours worked

41 tonnes of structural steel used

227 cubic metres of concrete poured

Finishing work

While the new lifts and key features of the Petersham Station Upgrade are now open, minor finishing works will continue to be carried out during September 2021.

Heritage features

In addition to the accessible features, the station upgrade has delivered a heritage interpretation with the installation of new lighting along the pedestrian footbridge.

The replica heritage lights (pictured below) are inspired by lanterns at the station in the 1890s.
