

Digital Systems Program

Woolloomooloo

COMMUNITY NOTIFICATION

July 2021

Transport for NSW is rolling out new technology to upgrade Sydney's rail network and introducing modern signalling as part of the Digital Systems Program.

Part of 'More Trains, More Services', the Digital Systems Program will replace current signalling and train control technology with modern, internationally proven, intelligent systems. It will help improve reliability and increase capacity on Sydney's railways once implemented widely across the network.

Project overview

Initial work will involve installing new track infrastructure inside the rail corridor along the Eastern Suburbs line from Erskineville to Bondi Junction.

Work activity

Over the coming months you may notice the following activities:

- Installation and extension of existing power cable trays
- Site survey and investigation works.

Some additional survey and cabling work will be carried out throughout the night.

Upcoming work in your area

On Sunday 18 July between 2am and 10pm we will be working inside the rail corridor near the rail entrance at McElhone Street, Woolloomooloo. Workers will access the corridor from Sir John Young Crescent, Woolloomooloo. Activity will involve cabling works.

The work in your area will not be continuous. Every effort will be made to keep noisy works to a minimum and reduce impacts to the community whenever possible.

What you may notice

Equipment used during the work activity will include crane trucks, elevated work platforms, power tools such as drills and lighting towers.

Transport for NSW is committed to minimising noise impacts on the community. We switch off equipment when it is not being used, place equipment as far away from properties as possible and monitor our work activities to make sure noise levels are being managed effectively.
