

# Transport Access Program

## Erskineville Station Upgrade

The Erskineville Station Upgrade is part of the Transport Access Program, a NSW Government initiative to provide a station that is accessible to people with a disability, limited mobility, parents/carers with prams, and customers with luggage.

### Progress update

Site establishment began in August with clearing of the disused platform area adjacent to Platform 1. During a mid-month trackwork weekend, we also began piling footbridge foundations on Platform 2 and 3.

### Out of hours work during September

Over one night between **Monday 23 August and Friday 27 August (midnight to 4am)** we will be installing a clip-on fence to the track between Platform 1 and 2.

Over **two nights between Monday 30 August to Friday 3 September** we will be removing machinery from Platforms 2 and 3. Machinery will be removed via hi-rail equipment on the tracks.

Throughout **September between 8pm and 5am** we will be identifying, relocating and installing services. This will occur around the perimeter of the station between and along Platforms 1 and 4 when there are no train services. This work will be using small handheld tools and you may notice task lighting.

From **11.59pm Friday 10 September to 4am Monday 13 September** we will be working around the clock. Work includes:

- Relocating and installing services around the perimeter of the station between and along Platforms 1 and 4

- Removing materials adjacent to Platform 1
- Installing concrete footings for the new canopies and new footbridge on Platform 2 and 3
- Excavating for the new lift on Platform 2 and 3.

### Mid-week work

We have begun the foundation work for the four new lifts, stairs, canopy covers and footbridge. Work during the day includes:

- Piling, concreting and excavating
- Tree removal adjacent to Platform 1 and 4
- Replacement of perimeter fence adjacent to Platform 4
- Installing new site offices adjacent to Platform 1

*\*Change of standard construction hours: The NSW Government has introduced extended operating hours for construction sites to support the industry during the evolving COVID-19 situation, with sites now able to operate on weekends and public holidays. The standard construction hours at this station is 7am-6pm Monday to Sunday, including public holidays.*

### Bridge Street footpath and cyclepath

Throughout September there will be intermittent closures of the footpath on Bridge Street, adjacent to Platform 4. This is for the safe parking of concrete and pump and vacuum truck for work on Platform 4.

Please use the other footpath. Cyclists will also be asked to dismount or safely enter Bridge Street under traffic control. **Please see map below showing these changes.**

### What to expect

We'll be implementing noise reduction measures like noise blankets, turning equipment off when not in use and placing equipment as further away as possible from properties.

Construction lighting will be turned away from properties or turned off when not required to help reduce light spill.

Stockpiling of and removal of materials adjacent to Bridge Street and Platform 1.

Equipment to be used throughout September include: excavator, piling rig, road saw, tipper truck, concrete truck and pumps, vacuum truck, grinder, dump truck, handheld breaker, chainsaw, chipper, task lighting, lighting towers generators, and various hand and power tools.

### Map of work area

There will also be deliveries and removal of plant and materials from site via the Swanson Street, Macdonaldtown and Eveleigh Yard rail access gates. Deliveries will be made under traffic and pedestrian control measures.

The Erskineville Station Upgrade team is committed to following the advice of the NSW Government, abiding to all COVID-19 safe practices.
