

Transport Access Program

Erskineville Station Upgrade

Have your say

Artist's impression of the proposed Erskineville Station Upgrade, subject to detailed design

The NSW Government is improving accessibility at Erskineville Station

Planning is currently underway to improve accessibility at the station. The community is invited to provide feedback on the Review of Environmental Factors (REF) from **Monday 15 March until Monday 29 March 2021**. Community feedback will help us understand what is important to customers and the community.

Key features of the proposed upgrade include:

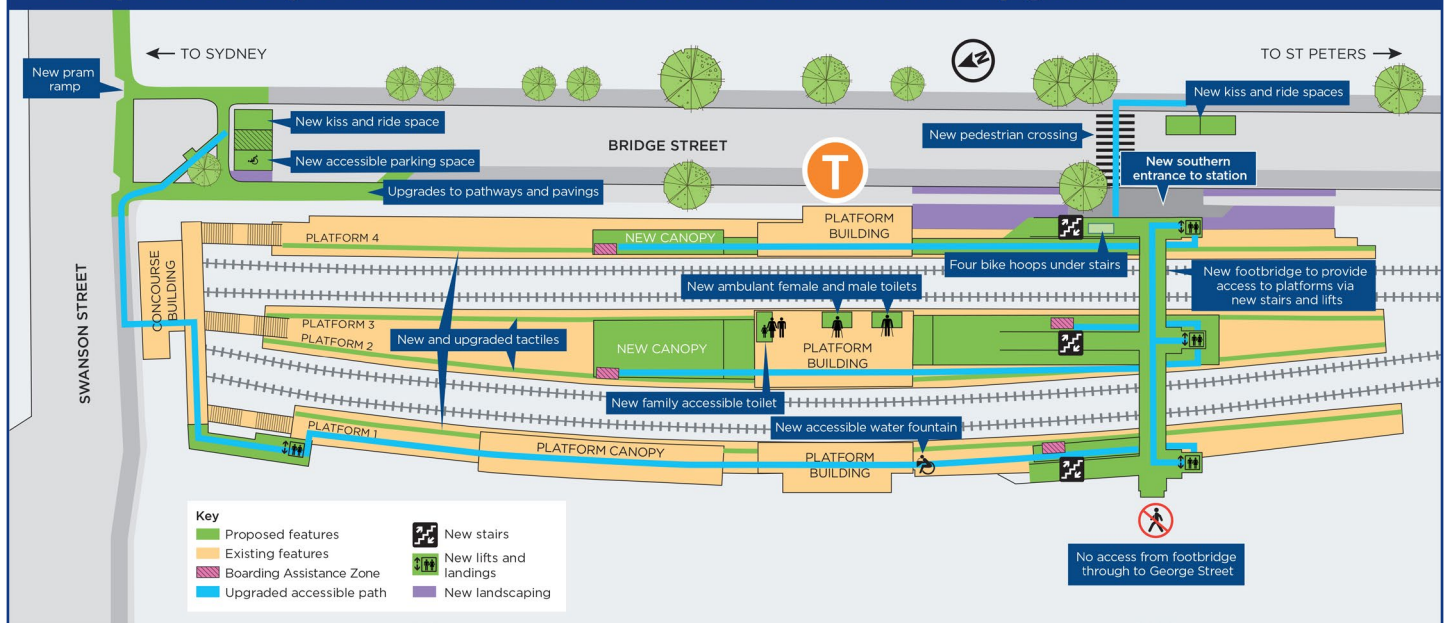

- A new southern entrance at Bridge Street
- New lifts and stairs
- New canopies at station platforms, to provide better weather protection
- New family accessible, and male and female ambulant toilets
- Upgrades to pedestrian pathways throughout the station precinct
- New kiss and ride spaces
- A new accessible parking space
- New bicycle hoops
- A new accessible water fountain
- A new pedestrian crossing on Bridge Street
- New and upgraded platform tactiles, to help customers with visual impairment
- Improvements to CCTV, lighting and wayfinding signage.

Subject to planning approval, construction is expected to commence in late 2021 and take up to 18 months to complete.

Access from footbridge to George Street investigated but not possible

A connection to the footbridge from George Street is not supported because it would be via the Kirsova 2 Playground, resulting in a loss of green space.

Pedestrians from George street could continue to use the underpass at lower George street to access the other side of the rail corridor.

Next steps

Transport for NSW develops initial concept design options for the project, including identification and consideration of environments constraints, risks and opportunities.

**We are
here**

Transport for NSW prepares a Review of Environmental Factors (REF) for public display and invites submissions.

Transport for NSW assess and responds to feedback and prepares a submission report/determination report with proposed conditions to minimise environmental impacts.

Transport for NSW determines the Proposal.
Conditions of Approval made available on Transport for NSW website.

Construction commences subject to compliance with conditions.

COVID-19 social distancing measures

Under normal circumstances Transport for NSW would hold community information sessions at the station.

Due to COVID-19 social distancing measures we are available by phone and email and look forward to hearing your questions and feedback that way.

If you have any questions, please call the Project Infoline on **1800 684 490** or email projects@transport.nsw.gov.au

Review of Environmental Factors

The Review of Environmental Factors (REF) is a planning document outlining the proposed work, potential impacts and mitigation measures.

The document includes comprehensive assessments on the existing environment and potential impacts of the project on the following areas including traffic and transport, biodiversity, heritage, noise and vibration and visual impacts.
