

# Transport Access Program

## Killara Station Upgrade

### Project update

January 2022

Transport for NSW is upgrading Killara Station as part of the Transport Access Program (TAP) to make it easier for everyone to access, including people with a disability or limited mobility, parents/carers with prams, and customers with luggage.

### Upcoming work in January

From **Monday 10 to Friday 14 January 2022** further utility investigations will be undertaken on Werona Avenue. These works are critical to ensuring the location of utilities.

The work will include:

- surveying the area
- vacuum excavation and mechanical compaction
- geotechnical drilling.

To complete these investigations, workers will require the use of specialised equipment, including a vacuum truck, concrete saw, geotechnical drilling rig and non-powered hand tools.

Much of the work will be completed inside the construction compounds on Werona Avenue. However, there may be intermittent interruptions to pedestrian access and traffic on Werona Avenue to allow for trucks to safely enter and exit. Please allow extra travel time and follow the instructions of traffic control staff and signage while this work is carried out.

### Night work in January

For the safety of our workers, pedestrians and motorists, the following night work is scheduled in January.

On **Monday 10 January 2022** from **6pm and 7am** night work will take place to install new line markings on Werona Avenue. This work is expected to be noisy at times. Wherever possible, measures to reduce noise will be implemented including scheduling noisy work during daytime hours, turning off vehicles and equipment when not in use, monitoring noise, using non-tonal reversing beepers and the installation of temporary acoustic barriers.

Night work will also take place on **Monday 24, Tuesday 25, Thursday 27, and Friday 28 January 2022** from **10pm to 4am**.

Some of this work will take place in the rail corridor and needs to be carried out during a scheduled Sydney Trains track work period when trains will not be running. Work during this time will include the delivery of materials on to the station platform and some vacuum excavation. To complete this work, construction crews will require the use of equipment such as hi-rail and vacuum trucks.
