

# Commuter Car Park Program

## Leppington

Project update

October 2021

*Construction progress on the multi-storey commuter car park at Leppington. In this photo you can see the solar panels being installed on the roof, one of the great sustainable features of the car park.*

Transport for NSW is delivering a multi-storey commuter car park with approximately 1,000 additional parking spaces at Leppington Station to provide you with more convenient access to public transport and reduce congestion on our roads.

### Progress update

Construction work is continuing through October. Work activities will be carried out in line with the latest Public Health Orders and COVID safety practices are in place to keep our workers and the community safe.

Over the month prior, all electrical, hydraulic, mechanical, façade, line marking, and painting work have been completed. Landscaping has started around the multi-storey car park. Electrical work for the Park&Ride boom gate has started in the existing north car park.

## Upcoming work

During October the following work will occur:

- Completion of solar panels installation
- External work and landscaping
- Civil and electrical work continuing for Park&Ride boom gates.

## Park&Ride boom gate installation

What is happening?

Park&Ride car park, boom gates will be installed at the entry and exit points of each car park. The electrical services work, required to power the boom gates, began at the end of September.

What will the work look like?

Up to 130 parking spaces will be temporarily unavailable during this work. Work will be staged where possible to minimise impacts to commuters.

Work areas will be set up to install in-ground electrical service lines followed by asphalt, line marking, pavement and landscaping work. Equipment to be used will include excavators, tip trucks and concrete trucks.

The traffic flow in the northern car park will be rearranged to move traffic to an alternate entry or exit point. Traffic controllers will be present to assist commuters and manage traffic flow during the work.

### About Park&Ride

The Leppington Commuter Car Park will be a Park&Ride facility to provide more spaces for customers who want to travel on public transport.

Customers will be able to park for free for up to 18 hours each day. All you have to do is complete a public transport journey by tapping on and off using an Opal card, then use the same Opal card when you exit the car park. Non-public transport users can also use Park&Ride car parks but will be charged a fee. This system is designed to prevent overuse of Park&Ride commuter car parks by non-public transport users and make it easier for public transport users to secure a parking space.

## Work hours

Work will be conducted between **7am and 6pm Monday to Sunday**.

## Keeping you up to date

We will continue to keep the community informed with regular project updates. More information is available on our website [www.transport.nsw.gov.au/leppington](http://www.transport.nsw.gov.au/leppington). If you would like to sign up to our project distribution list, please contact us on **1800 684 490** or email [projects@transport.nsw.gov.au](mailto:projects@transport.nsw.gov.au) and we will email you regular updates.

For all urgent enquiries or complaints regarding construction activities, please call our **24-hour Construction Response Line** on **1800 775 465**.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **1800 684 490**. The interpreter will then assist you with translation.
