

Commuter Car Park Program

Leppington

Project update

September 2021

Progress photo of the new multi-storey commuter car park at Leppington.

Transport for NSW is delivering a multi-storey commuter car park with approximately 1,000 additional parking spaces at Leppington Station to provide you with more convenient access to public transport and reduce congestion on our roads.

Project status

Work on the new multi-storey commuter car park has restarted. Our work activities are being carried out in line with the current Public Health Orders and a COVID Safe plan is in place. The safety and wellbeing of our workplace and the wider community is our highest priority.

Progress update

Over the month prior, we completed the high voltage electrical and water drainage installations. The perimeter scaffold is now completely dismantled. Painting, façade, solar panels installation and line marking are continuing.

New accessible parking spaces

What is happening?

Work will take place to convert 32 existing parking spaces to 21 new accessible parking spaces in the existing north and south car parks. Two of the new accessible parking spaces in the northern car park will have electric vehicle charging stations. This work will also include lighting upgrades, new line marking and bollards. Work will be staged and up to 20 parking spaces will be temporarily unavailable at a time during this work.

What will the work look like?

To minimise impact to commuters, this work will take place over two weekends in September. At each car park a small work area will be set up. We will use a mini crane and line marking equipment.

Signage will be installed ahead of the work to advise commuters which spaces will be unavailable.

Park&Ride - boom gate installation

What is happening?

To make this a Park&Ride car park, boom gates will be installed at the entry and exit points of each car park. The electrical services work, required to power the boom gates, will begin at the end of September. Park&Ride is designed to free-up more spaces at commuter car parks for customers who want to travel on public transport.

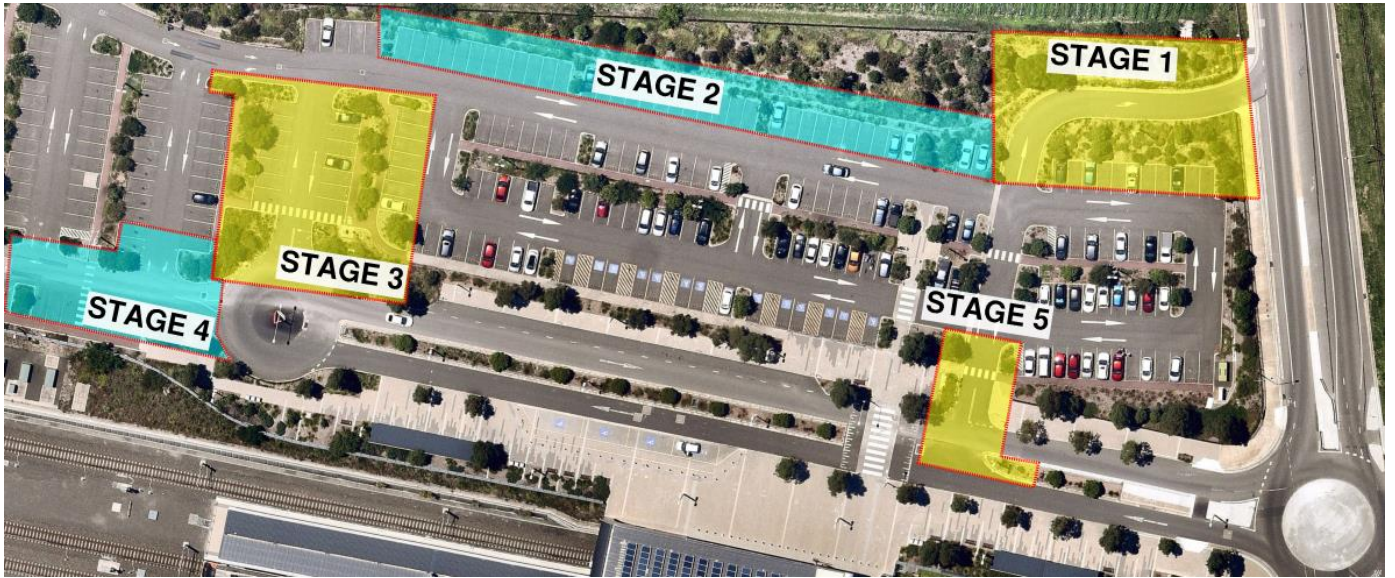

It will provide customers with up to 18 hours free parking each day. All you have to do is complete a public transport journey by tapping on and off using an accepted Opal card, then use the same Opal card when you exit the car park. Non-public transport users will be able to use Park&Ride car parks but will be charged a fee for use. This system is designed to prevent overuse of Park&Ride commuter car parks by non-public transport users and make it easier for public transport users to secure a parking space.

What will the work look like?

Up to 80 parking spaces will be temporarily unavailable during this work. Work will be staged where possible to minimise impacts to commuters. Please see map overleaf for location.

Work areas will be set up to install in-ground electrical service lines followed by asphalt, line marking, pavement and landscaping work. We will use excavators, tip trucks and concrete trucks.

The traffic flow in the northern car park will be rearranged to move traffic to an alternate entry or exit point. Traffic controllers will be present to assist commuters and manage traffic flow during the work.

Upcoming work

Work to occur in September will include:

- installing solar panels
- building exterior work and landscaping
- conversion of parking spaces in the north and south car parks
- connecting high voltage electricity supply
- connecting water supply
- continuing civil and electrical services work for boom gates.

Work hours

Work will be conducted between **7am and 6pm Monday to Sunday.**

Keeping you up to date

We will continue to keep the community informed with regular project updates. More information is available on our website www.transport.nsw.gov.au/leppington. If you would like to sign up to our project distribution list, please contact us on **1800 684 490** or email projects@transport.nsw.gov.au and we will email you regular updates.

For all urgent enquiries or complaints regarding construction activities, please call our **24-hour Construction Response Line** on **1800 775 465**.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **1800 684 490**. The interpreter will then assist you with translation.
