

September 2021

Transport Access Program

Normanhurst Station Upgrade

The Normanhurst Station Upgrade is part of the Transport Access Program, a NSW Government initiative to provide a station that is accessible to people with a disability, limited mobility, parents/carers with prams, and customers with luggage.

We thank you for your patience during this important work.

September work

Our September work will continue with excavation and piling work for the new lifts, disconnection of services and connections of new services within the rail corridor. There will also be upgrades to the station building on Platform 1.

Our work hours remain unchanged, between **Monday and Friday 7am and 6pm.**

The NSW Government has introduced extended operating hours for construction sites to support the industry during the evolving COVID-19 situation, with sites now able to operate on weekends and public holidays. If we need to work on weekends, we will notify you of this change.

October work

During this month, we will be working to carry out the following activities:

- Upgrades to the Waiting Room on Platform 1
- Regrading of the platforms
- Upgrades to the Denman Parade station entrance

Covid-19 Safe Practice

The Normanhurst Station Upgrade is committed to follow the advice of the NSW Government abiding to all safe COVID-19 safe practices.

Temporary footpath closure of Normanhurst Station footbridge

During the month of September, **the temporary closure of the station footbridge will take place for up to five days.**

The closure of the footbridge is to allow for piling and excavation work to be carried out safely.

Please refer to the map for pedestrian detours around the station via Buckingham Avenue. There will be signage of detours to guide pedestrians.

How will this work effect you?

The equipment used throughout September and October will include; excavators, piling machines, vaccum trucks, road saws, tipper trucks, concrete trucks and pumps, dump trucks, chainsaws, chippers, lighting towers and various power tools.

Where possible, measures will be implemented to reduce noise and dust associated with this work, including adding shade cloth mesh to fencing, using noise blankets, turning off vehicles and equipment when not in use and using non-tonal reversing beepers.

HSC Trials

Is there someone in your household studying for the HSC? Please contact us if you have questions or concerns.

Map of work area

Temporary changes

There may be some temporary footpath closures on Malsbury Road, Normanhurst, to allow for the access and movement of machinery to the work site adjacent to Platform 2. Please follow traffic controller directions.

Up to three car parking spaces on Denman Parade between Buckingham Avenue and Normanhurst Road will be temporarily unavailable to allow for plant and machinery to access the work zone safely.

The taxi rank on Denman Parade will be temporarily closed for up to five days in September.
