

# New Intercity Fleet Maintenance Facility

## NIGHT WORK NOTIFICATION

The New Intercity Fleet Maintenance Facility at Kangy Angy was designed and constructed by John Holland Group on behalf of Transport for NSW.

John Holland's construction of the facility is complete, however work is required to a verge on Enterprise Drive, near the traction substation.

### Enterprise Drive: verge works

From 11 October, for up to five nights

Concreting, asphaltting and landscaping work is required to the verge on Enterprise Drive outside the traction substation.

**While John Holland will complete as much work as possible during the day, most of the work needs to be completed at night to avoid daytime traffic.**

John Holland expect to complete the work in four days, however the work could take up to five days (depending on weather and progress). No work will be undertaken on Saturday or Sunday nights.

### Lane closure: Enterprise Drive

Nightly from 6pm to 7am

As the works area is immediately adjacent to live traffic, the northbound lane of Enterprise Drive, near the traction substation will be closed between 6pm – 7am. A reduced speed limit of 40km/h will also be in place during the night work.

Signage and traffic management staff will be in place to manage the traffic changes.

### Managing impacts

While some work will be noisy at times, the project team will take all steps to minimise noise impacts.

A range of mitigation measures will be used, including turning equipment off when not in use, and where possible, equipping machinery with non-tonal movement alarms.

Higher impact work such as hammering will be completed by 10pm each night.

## Equipment to be used

- Concrete saw
- jackhammer
- excavator
- heavy and light vehicles
- hand tools
- road sweeper
- lighting towers and generator.
