Community feedback

Transport for NSW would like to thank everyone who provided feedback earlier this year on the proposed route for SCATL which picks up near Kirrawee on Oak Road and continues to Gymea, Miranda, Caringbah and onwards towards Cronulla.

We received over 500 pieces of feedback through the online survey, community meetings, and emails to the project team. We have considered all feedback and prepared a report to summarise and respond to the feedback we received.

The Consultation Report for SCATL is now available online at: nswroads.work/scatl

Themes from community and stakeholder feedback included:

- Support for the project
- Alternative routes
- Impacts to trees and vegetation
- Ambience and user experience
- Design, layout and traffic
- Safety and security
- Impacts to parking
- Other transport improvements.

Three key areas of concern for the community are **safety, parking and tree impacts**. These three themes have been a priority focus of the design for the proposed link, and will remain a key priority through the next phase of the project. Further detail on how we've responded to these themes can be found in the Consultation Report.

What happens next?

We have continued work on the detailed design for the proposed route and continued consultation with key stakeholders.

We will soon publicly display the Review of Environmental Factors for the proposed route and once again we will invite your feedback. We want to make sure that we deliver an active transport link that is suitable for the community that will use it.
