

Transport Access Program

Unanderra Station Upgrade

Have your say

The NSW Government is improving accessibility at Unanderra Station

We are delivering this upgrade as part of the Transport Access Program, an initiative to provide a better experience for public transport customers by delivering modern, safe and accessible infrastructure.

Construction update

Construction at Unanderra Station is starting in September. Work will initially involve station building and platform work including:

- new family accessible toilet with baby change table
- new unisex ambulant toilet
- staff area modifications to allow for new family accessible facilities
- boarding assistance zones to each platform
- new digital public address system and hearing loops.

With planning approval, this work will be closely followed by:

- a new footbridge in the centre of the platform with three connecting stairways and three new lifts

- canopies over the footbridge and stairs for year-round shelter and customer comfort
- three upgraded accessible car spaces and new 'kiss and ride' zones
- accessible paths at the station entrances
- a new pedestrian crossing to Berkeley Road west
- new closed circuit television cameras and lighting
- removal of the existing footbridge once the new footbridge and lifts are operational.

It is anticipated work will be open to the public in December 2022, weather and circumstances permitting.

New footbridge design

Following the Review of Environmental Factors in July 2020, we conducted detailed investigations and analysis on two footbridge options.

This included the ongoing maintenance costs once the project was complete. It was determined that building a new footbridge rather than upgrading the existing structure would result in considerable financial savings over the next 30 years.

This proposal is considered to offer transport customers the following additional benefits:

- less impact during construction
- a shorter construction program
- improved urban design and customer experience with completely new infrastructure, built to current standards
- elimination of safety risks associated with underground services next to the existing footbridge.

Changes to car parking

Both the original and new footbridge designs result in the loss of nine parking spaces on Berkeley Road West.

We are aware of the impact car park losses will have on our transport customers, which is why we are investigating the possibility of creating additional car parking within the rail corridor, to the north of the commuter car park. We will keep the community informed about these investigations.

Canopies to provide year-round shelter

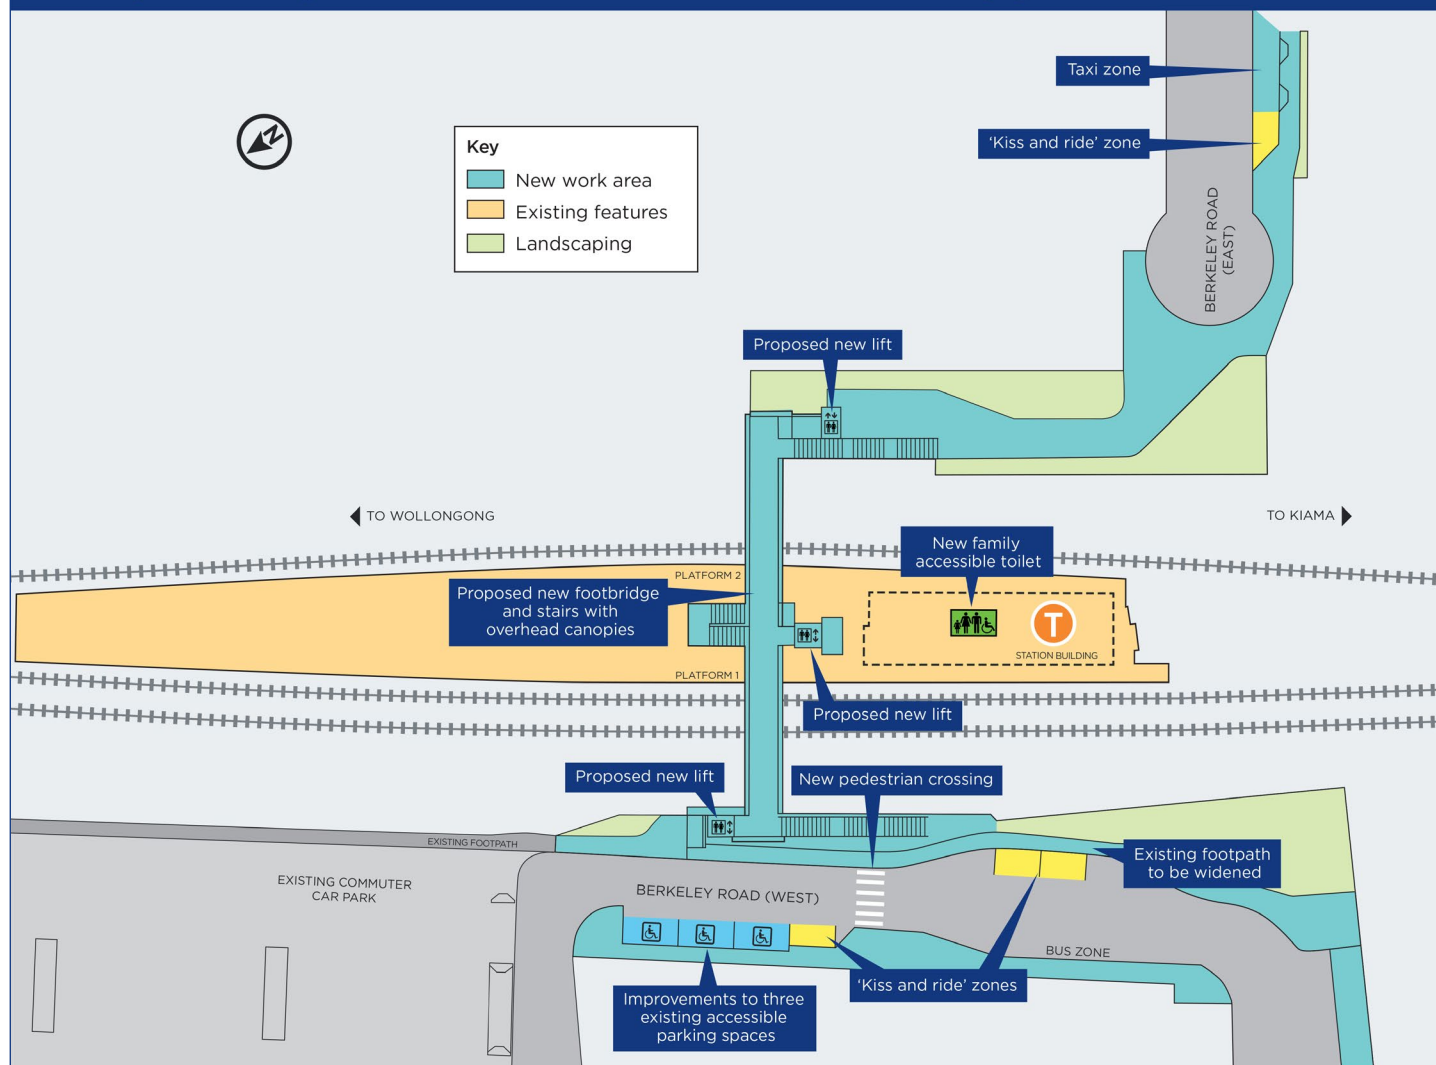

During the Review of Environmental Factors process and since, we received a number of requests for canopies to weather-proof walkways and waiting areas.

As a result of those requests, we have incorporated canopies into the new footbridge option (the existing bridge does not have the structural capacity for a canopy to be added). The new design includes canopies over the full length of the footbridge and all three stairways (see diagram for more details).

How to provide feedback

Transport for NSW invites your feedback on the new footbridge proposal from **Monday 16 August to Friday 27 August 2021**.

Please send your comments via email to projects@transport.nsw.gov.au or call us on the Project Infoline on **1800 684 490**.

Written comments can be posted to **Transport Access Program – Unanderra Station Upgrade** Director Rail Development and Delivery Environment and Sustainability, Transport for NSW PO Box K659, Haymarket NSW 1240.

Please provide your feedback by **5pm Friday 27 August 2021**.

Keep in touch

We will continue to keep the community informed with regular project updates. Find out more about the project online at transport.nsw.gov.au/unanderra.

If you would like to be added to the project distribution list, please contact us on **1800 684 490** or email projects@transport.nsw.gov.au.

For all urgent enquiries or complaints regarding construction activities, please call our 24-hour Construction Response Line on **1800 775 465**.

This document contains important information about public transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on **131 450** and ask them to call Transport for NSW on **(02) 9200 0200**. The interpreter will then assist you with translation.
