

# Transport Access Program

## Yagoona Station Upgrade

### Planning approval received

#### Planning approval has been granted for the Yagoona Station Upgrade

Detailed design is now underway, with major construction expected to commence in the coming weeks.

Yagoona customers are set to benefit with an upgraded station that is fully accessible. Transport for NSW would like to thank the community for their feedback. We received 25 submissions from the community during the public display of the Review of Environmental Factors (REF) between Tuesday 18 May to Tuesday 1 June 2021.

All submissions received were considered as part of the planning process and have been addressed in the Determination Report which can be found on the project website [www.transport.nsw.gov.au/yagoona](http://www.transport.nsw.gov.au/yagoona).

#### Key features of the proposed upgrade include:

- replacing the existing station entry concourse, building and stairs with a new station entry concourse from the Hume Highway including a new lift and stairs connecting the concourse to the station platform
  - a new station building on the island platform for station facilities, including a new family accessible toilet and new male and female ambulant toilets
  - additional platform canopies to provide continuous cover from the new lift and stairs to Platform 1 boarding assistance zone
  - two new accessible parking spaces in the Breasley Place commuter car park and upgrade of the two accessible parking spaces in the Ritchie Road commuter car park
  - upgrade of pathways from both commuter car parks to the station entrance
  - new kiss and ride bay on Hume Highway
  - platform regrading and new tactile installation
  - relocating existing bike hoops
  - upgrades to lighting, and CCTV.
- Construction is expected to take up to 18 months to complete.

#### What we heard

Feedback received during the public display period showed that the community supported improving accessibility at Yagoona Station.

Other key themes that were identified in the feedback include request for increased safety measures including lighting and CCTV cameras and general improvements to the station and surrounding areas.

## Upcoming work and site establishment

From **Wednesday 14 July 2021** site establishment will begin at Yagoona Station. Activities include:

- establishing a construction compound in the commuter car parking area within the Breasley Place car park
- connecting electrical and water services to the construction compound
- installing a ramp at the end of the platform within the rail corridor to enable delivery of equipment and materials for construction
- site surveying and investigations on the platform, in the rail corridor and surrounding station areas.

Equipment to be used includes delivery vehicles, drill rig, mobile crane, elevated work platform, excavators and power and hand tools.

## Temporary parking changes

To enable the safe delivery of the station upgrade, 19 car parking spaces will be unavailable in the commuter parking within Breasley Place car park. This is to accommodate the construction compound and will remain unavailable for the duration of construction at Yagoona Station.

Please use alternate parking in Breasley Place or Ritchie Road commuter car park.

## Yagoona Station Upgrade: working areas

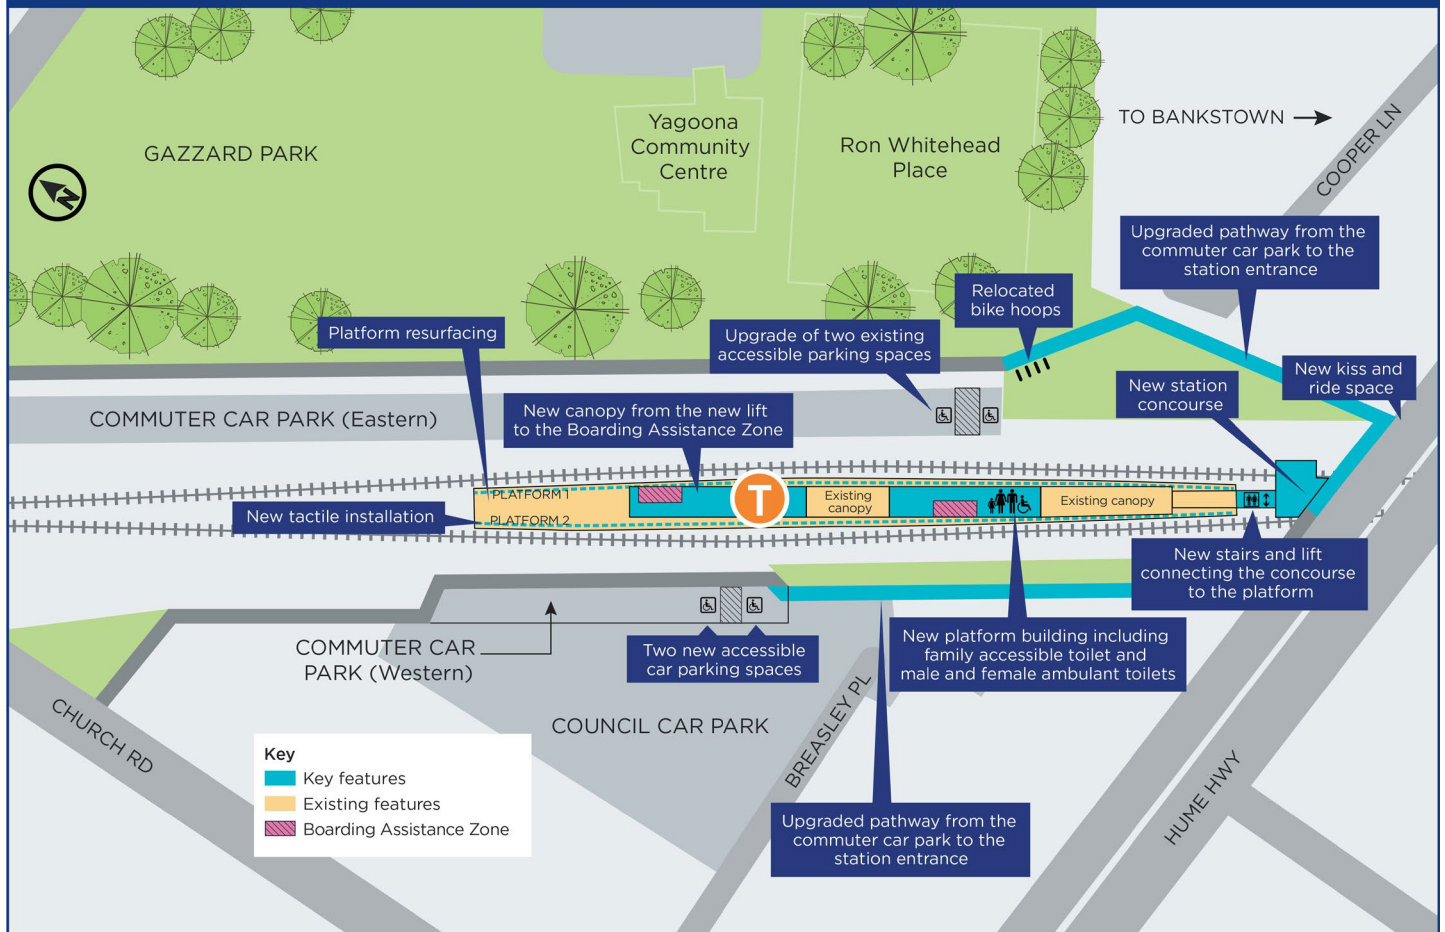

## Transport Access Program

Yagoona Station Upgrade is being delivered as part of the Transport Access Program, a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure across the state. As part of the program, the Yagoona Station Upgrade will provide a station that is accessible to people with a disability, limited mobility, parents/carers with prams and customers with luggage.
