

Transport Access Program

Tuggerah Station Upgrade

Project update June 2022

Artist's impression of the Tuggerah Station Upgrade from the west, subject to detailed design

The NSW Government is improving accessibility at Tuggerah Station

Planning approval has been received for the upgrade of Tuggerah Station.

The approval follows community consultation on the Review of Environmental Factors between 16 March and 6 April 2021, and preparation of a Determination Report. The project team received 12 submissions during the public display. We would like to thank the community for their feedback.

Each submission was considered and responded to in the Determination Report. The report and associated conditions of approval are available at www.transport.nsw.gov.au/tuggerah

The upgrade is part of the Transport Access Program, a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure across the state.

The Tuggerah Station Upgrade will provide a station that is accessible to those with a disability, limited mobility, and parents/carers with prams and customers with luggage.

Early work construction contract has been awarded

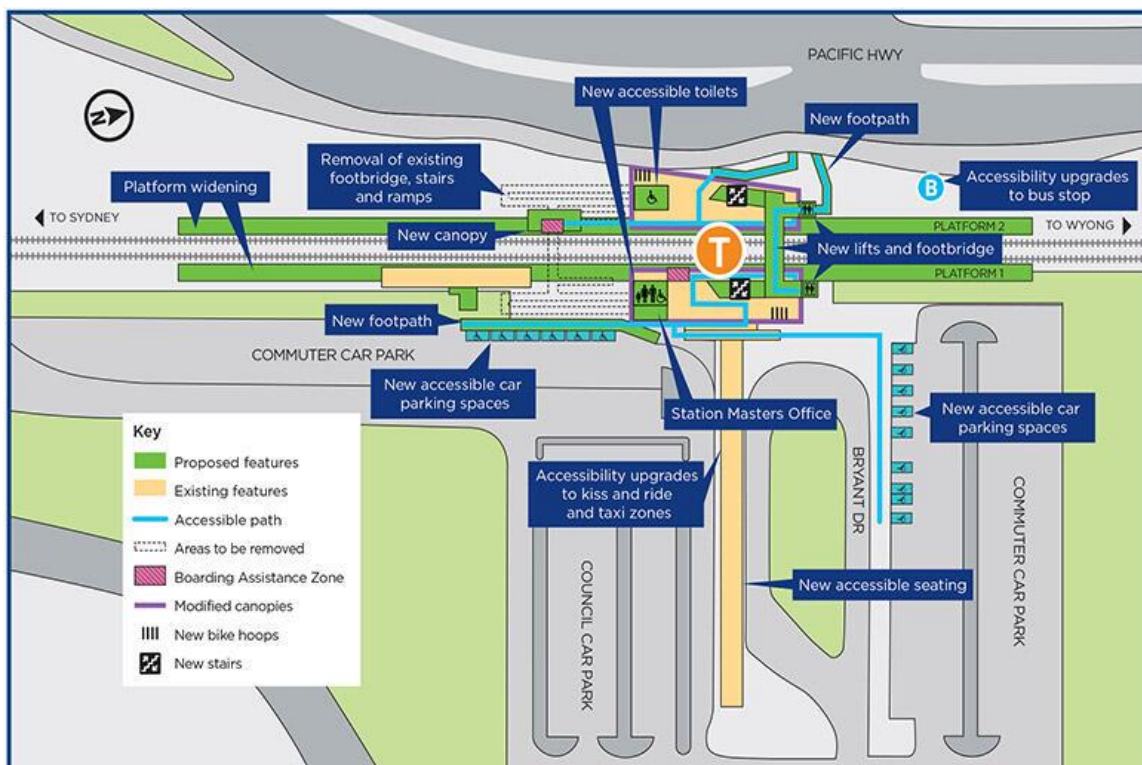

Since receiving planning approval, the early work construction contract for the upgrade to Tuggerah Station has been awarded to Downer EDI.

Downer EDI will start work on the detailed design of the new station on behalf of Transport for NSW. Service searches, survey, soil testing and Geotech sampling will start from **Saturday 11 June 2022**.

The upgrade will include:

- new pedestrian footbridge, lifts and stairs connecting the Pacific Highway, commuter car park and station platforms
- new and extended canopies at station platforms
- new family accessible, and male and female ambulant toilets
- platform widening to improve customer accessibility
- demolition of the existing footbridge, stairs and connecting ramps
- upgrades to station entrances including landscaping and new bicycle hoops
- 15 accessible parking spaces in the commuter car park
- accessibility upgrades to bus stops, and kiss and ride spaces
- improvements to CCTV, lighting, and wayfinding signage
- new and upgraded footpaths at station entrances.

Planning is also underway to provide additional commuter car parking at Tuggerah. The initiative forms part of the \$408.9 million commitment through the Commuter Car Parking Program, to provide additional car spaces for public transport users at key transport interchanges.

Upcoming site establishment and early work

We expect to start site establishment and investigation work from **Saturday 11 June 2022**, weather permitting. This early work will continue until **October 2022**, weather permitting. Activities will include:

- site compound establishment
- surveying and investigation work expected to start
- trimming and removing approved vegetation
- connecting temporary electrical and water services
- relocating electrical and water services on the station platform and surrounding precincts
- installation of temporary ramps and stairs expected to start in late-2022.

Equipment to be used includes a mobile crane, small drilling rig, excavators, surveying equipment, delivery/concrete trucks, concrete pumps, construction trucks, power and hand tools.

Construction hours

Standard construction hours are 7am to 6pm every day, including public holidays. We will notify nearby residents and businesses in advance if we need to work outside these times.

Night work in June

For the safety of our workers, pedestrians and motorists, the following night work is scheduled.

From **12am Saturday 11 June to 12am Tuesday 14 June**, our workers will commence establishment of sheds and fencing and non-destructive digging for survey and utilities investigation.

Temporary traffic, access and parking changes

During the work to upgrade the station, there may be occasional temporary traffic changes surrounding Tuggerah Station on the Pacific Highway and Bryant Drive. These changes may include single lane closures and the temporary parking removal to accommodate large vehicles during construction.

Traffic control and signage will be in place to help pedestrians and motorists.

We will notify residents and businesses in advance of changes to station access.
