

Como Commuter Car Park

Commuter Car Park Program

December 2022

Transport for NSW is delivering a new commuter car park at Como as part of the NSW Government's Commuter Car Park Program.

The project will provide up to 34 new commuter car parking spaces to deliver more convenient access to public transport and help ease congestion on our roads.

Planning approval

Thank you to all the community members who provided feedback on the concept design during the October and November 2022 consultation period.

The project has received planning approval, Transport for NSW has awarded a contract to Stephen Edwards Construction Pty Ltd to deliver the works, and detailed design will commence in the coming months. Main construction is anticipated to begin mid-2023.

What work are we doing?

The new commuter car park will include:

- a new ground level car park providing up to 34 parking spaces
- new footpath from the car park connecting to the existing train station entrance
- lighting, wayfinding signage and fencing to the car park
- landscaping within the car park.

When and where we'll be working

Some initial site investigations may be completed in December and early 2023. This will involve geotechnical investigations, site survey, and services location during standard construction hours.

Standard construction hours on this project are between **7am and 6pm Monday to Friday and 8am and 1pm on Saturdays.**

What will this mean for you?

You may notice:

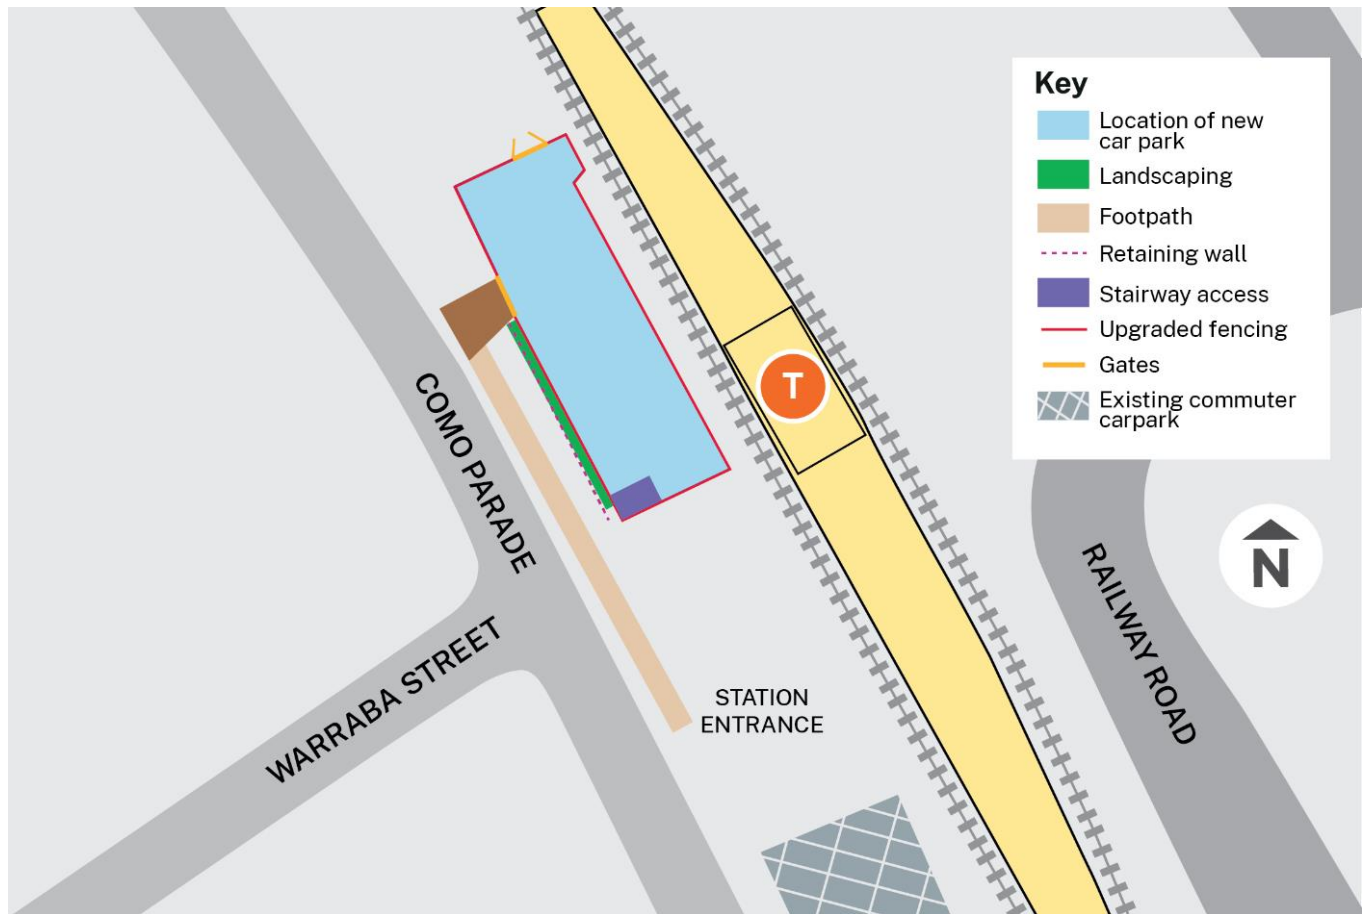

- workers and vehicles
- noise from machinery and equipment.

Managing our impacts

We understand construction activities may cause disruption to our closest neighbours, and every effort will be made to minimise the impacts where possible, including:

- turning off equipment when not in use and using non-tonal reversing alarms to reduce potential noise impacts to the surrounding community
- locating equipment as far away from residents and businesses as possible
- conducting on-site monitoring to ensure compliance with strict environmental conditions relating to noise, vibration and dust management.
